Cyber Defence in the Age of AI, Smart Societies and Augmented Humanity Hamid Jahankhani, Stefan Kendzierskyj, Nishan Chelvachandran, Jaime Ibarra, 2020-04-06 This publication highlights the fast moving technological advancement and infiltration of Artificial Intelligence into society. Concepts of evolution of society through interconnectivity are explored together with how the fusion of human and technological interaction leading to Augmented Humanity is fast becoming more than just an endemic phase but a cultural phase shift to digital societies. It aims to balance both the positive progressive outlooks such developments bring with potential issues that may stem from innovation of this kind such as the invasive procedures of bio hacking or ethical connotations concerning the usage of digital twins. This publication will also give the reader a good level of understanding on fundamental cyber defence principles interactions with Critical National Infrastructure CNI and the Command Control Communications and Intelligence C3I decision making framework. A detailed view of the cyber attack landscape will be garnered touching on the tactics techniques and procedures used red and blue teaming initiatives, cyber resilience and the protection of larger scale systems. The integration of AI smart societies the human centric approach and Augmented Humanity is discernible in the exponential growth collection and use of big data concepts woven throughout the diversity of topics covered in this publication which also discusses the privacy and transparency of data ownership and the potential dangers of exploitation through social media. As humans are become ever more interconnected with the prolificacy of smart wearable devices and wearable body area networks the availability of and abundance of user data and metadata derived from individuals has grown exponentially. The notion of data ownership, privacy and situational awareness are now at the forefront in this new age.

Worldwide Intelligent Systems Jay Liebowitz, David S. Prerau, 1995 Telecommunications firms worldwide are actively involved in AI applications for resolving network management and telecommunications problems. This book addresses the following major functional areas: planning, scheduling, monitoring, control, fault classification and diagnosis, training and help desks. Recent and emerging AI techniques are applied, including neural networks, expert systems, integrating rule based systems with case based reasoning systems, genetic algorithms, distributed AI and intelligent tutoring systems. Readers, researchers and professionals in telecommunication, AI experts and graduate students.

OSF DCE User's Guide and Reference Open Software Foundation, 1993 Since much of DCE is software for supporting the development and execution of distributed applications most of the DCE documentation is targeted for application programmers and administrators rather than end users. However, some parts of DCE are actually distributed applications for example the DCE Distributed File Service and the Access Control List facility of the DCE Security Service and are therefore seen at the end user level. This guide thus presents task and reference material for the DCE end user.

studies have conducted outlining the contributions and importance of technologies in tourism in general. However the tourism industry of Asia so far has attracted very few researchers. Some contributions have been made but not sufficient. Considering the ongoing trend of technology application in the tourism industry in Asia very few research attempts have been made aiming to explore diverse aspects. Tourism is expanding enormously across the world which actually creates more demands for effective technologies. This book will be a reading companion especially for tourism students in higher academic institutions. This book will also be read by the relevant policy planners and industry professionals. Apart from them this book will be appreciated by expatriate researchers and researchers having keen interest in the Asian tourism industry. **UNIX**
