**1% Daily Growth** Wayne Farrell, Everyone knows that change can be difficult Especially really big changes like trying to turn your whole life around What would it mean to you if you could completely change your life in the next 70 days Do you know how compounding interest works Interest is added to the principal and further interest is added on each new total Example 1% interest on 100 compounded daily The first day s interest will be 1% of 100 1 Meaning the new total is 101 00 The next days 1% interest is added and the total is now 102 01 After day three s interest is added the new total is ay 103 03 After only 70 days the original 100 has doubled to 200 64 This is also true for every area of life By improving by just 1% each day you can get 100% better in only 70 days This may just be the single most important habit to create As the old saying goes even the longest journey starts with a single step So even a thousand mile hike is simply a matter of lots of little single steps
