Handbook of Terrorism

and Counter Terrorism Post 9/11 David Martin Jones, Paul Schulte, Carl Ungerer, M.L.R. Smith, 2019-12-27 Almost two decades after the events of 9/11 this Handbook offers a comprehensive insight into the evolution and development of terrorism and insurgency since then. Gathering contributions from a broad range of perspectives it both identifies new technological developments in terrorism and insurgency and addresses the distinct state responses to the threat of political or religiously motivated violence not only in the Middle East and Europe but also in Africa, South and Southeast Asia and North and South America. **I-PEEL** James Brassett, Juanita Elias, Lena Rethel, Ben Richardson, 2023 I-PEEL The International Political Economy of Everyday Life is a student centred textbook for learning about IPE through the prism of everyday objects, subjects and practices. Psychology and Covid-19 in the Americas Nelson Portillo, Melissa L. Morgan, Miguel Gallegos, 2023-11-25 This book is the first of two volumes that bring together the works presented at the congress Contributions of Psychology to COVID-19 organized by the Interamerican Society of Psychology in 2020. This was one of the first virtual international meetings on psychology and COVID-19 in the world and brought together researchers and professionals from South Central and North America in a single online event. The content of both volumes includes many of the first issues addressed by researchers, scholars and practitioners across the Americas at the start of the pandemic before vaccines before knowledge of treatment and impact before our worlds and daily lives were forever changed. Chapters in the first volume focus on the impacts of the pandemic in mental health, social and family dynamics, educational processes and the work of health professionals. Chapters in the second volume are dedicated to studies addressing the impacts of the pandemic in vulnerable populations, proposals of psychological interventions to deal with the distress caused by COVID-19, strategies of coping, resilience and adaptation and the development of psychological instruments of measurement and assessments during the pandemic. The content of these two volumes marks a baseline for the collective work initiated by psychologists who came together to answer the call to combat the pandemic across the Americas. In that sense both volumes are truly a snapshot in time that could help us assess in the future how much progress we have made to apply psychology to the pressing demands of our time. **Entertained or Else** Tina Kendall, 2025-09-18 This book considers the complex and often contradictory relations that are forged between boredom and everyday media use in the twenty-first century and demonstrates how networked media have developed new technical means of capitalizing on boredom's state of suspension to make it into a source of value creation. Focusing on the discursive, technological and affective structures that encourage users to be entertaining and to remain entertained, the book analyses how boredom has been increasingly instrumentalized as both an individual mood and a wider structure of feeling that drives participation across media networks. It identifies the range of cultural techniques for codifying, classifying, sensing and preempting boredom as well as those that teach users counter intuitively to embrace boring media as a means of coping with the intensities of always-on existence. However, if boredom is positioned in a digital network culture as a feeling that

keeps driving us back to our social media feeds it is important to ask how else it might operate While the technological affordances of computational media have put pressure on our ability to conceive of boredom as a radical challenge to digital capitalism this book attempts to think about the potential that might still be embedded in boredom s capacity to temporarily suspend or to neutralize dominant structures of attention and affect Building on the work of Giorgio Agamben Byung Chul Han Roland Barthes and from historical accounts of boredom and entertainment the book provides a new understanding of boredom in the context of networked media
