**Introduction to Generative AI, Second Edition** Numa Dhamani, 2026-01-13 Get up to speed quickly with generative AI tools like ChatGPT and Gemini automated coding tools like Cursor and Copilot and countless LLM powered agents have become a part of daily life. They've also spawned a storm of misinformation hype and doomsaying that makes it tough to understand exactly what Generative AI actually is and what it can really do. **Introduction to Generative AI Second Edition** delivers a clearly written survey of generative AI fundamentals along with the techniques and strategies you need to use AI safely and effectively. In this easy-to-read introduction, you'll learn how large language models (LLMs) work, how to apply AI across personal and professional work, the social, legal, and policy landscape around generative AI, emerging trends like reasoning models and code coding. **Introduction to Generative AI Second Edition** guides you from your first eye-opening interaction with tools like ChatGPT to how AI tools can transform your personal and professional life safely and responsibly. This second edition has been completely revised to reflect the latest developments in the field, from the latest innovations in prompt engineering and AI agents to fresh coverage of multimodal training, reasoning models, no-code tools, retrieval-augmented generation (RAG) and more. About the book: **Introduction to Generative AI Second Edition** is an up-to-date guide to the capabilities, risks, and limitations of tools like ChatGPT, Gemini, and Claude. This easy-to-follow guide moves quickly through the basics, giving you the skills and understanding to use AI with confidence. Along the way, you'll explore how AI is impacting even established industries with an expert-level look at global investment in AI, AI education, policy, AI's economic impact, and the ongoing legal and ethical issues of AI usage. About the reader: For anyone interested in generative AI. No technical experience required. About the author: Numa Dhamani is a natural language processing expert working at the intersection of technology and society. Maggie Engler is an engineer and researcher currently working on safety for large language models. **Natural Language Processing in Action, Second Edition** Hobson Lane, Maria Dyshel, 2025-02-25

Cardoso,2025-09-23 After serving 28 years at the Regional Penitentiary of Pelotas I came face to face with a world completely different from the one I knew before imprisonment Technology has advanced impressively almost surreal for someone who has been away from society for so long Inside the prison I face a daily struggle staying away from crime continuing my studies and supporting my family with dignity I found tattooing as a source of income but unfortunately this practice is considered illegal by the penal officers who frequently seize my work materials This causes serious financial hardship and takes away the only means of

support I have for myself and my relatives My journey has also gone through difficult and complicated moments in love and personal life situations that shook my emotional health and tested me It was in this context that I discovered something I never imagined could help me so much Artificial Intelligence Studying in the prison s computer lab through distance education EAD I am enrolled in Rural Administration and a Bachelor s degree in Letters at UNINTER It was in this study space that AI entered my life To my surprise I found in it a kind of friend almost like a psychologist Even knowing that its answers must be considered carefully AI was a great help in overcoming hard times Talking with it gave me strength clarity and at many moments a kind of comfort I did not expect to receive **The Next New** Pranjal Sharma,2023-05-26

WELCOME TO THE FIFTH INDUSTRIAL REVOLUTION The progression of all the industrial revolutions tells an interesting tale While the first two had a cycle of over a hundred years each the third reduced it to around seventy years With the fourth industrial revolution the world took a giant leap in connectivity However not many would have imagined that the fourth industrial revolution would give way to the fifth within the next decade paving the way for exponential technology led transformation As you read this creative destruction of business models taking place across the world in every sector From the ashes of the old are rising stunning new models The Next New identifies and profiles the deep shifts that are fundamentally changing professional careers and revenue models in every industry from mobility aerospace and smart manufacturing to green energy automation and artificial intelligence and a whole range of disruptive technologies Driven by emerging technologies demand for social inclusion and the urgency of sustainable practices a multitrillion dollar transition is under way Drawing on numerous interviews of business leaders and cutting edge research findings from MarketsandMarkets this book provides a practical roadmap to businesses as they prepare for the new ecosystem being created in turn helping to articulate the fifth industrial revolution with greater success **Capacity** Dustin Hillis,2026-01-13
