Organizational communication especially about change is becoming increasingly important. However research shows that employees don t pay much attention to management communication and that they don t trust it bull Cultures moving closer apart Are the trENDs in globalization the death of distance and the dominance of English as the international business language offset by divergence in national values attitudes and beliefs and what are the implications for management style and teambuilding bull Stop the bus let s get off While the ability to cope with constant radical change has become a core individual and corporate competence too much change too rapidly can damage personal and organizational effectiveness Is it time for painless change bull Love those rules that hierarchy Bureaucracy has had a bad press but many commentators now praise the advantages of stable hierarchies order predictability and status that it offers What does this mean in an age of new organizational forms bull Leaders who needs them Charismatic visionary transformational leaders were the must have corporate fashion accessory in the late 1990s but now we are witnessing a backlash Are celebrity bosses a dangerous curse bull Labouring not misbehaving Demanding aggressive and abusive customers are making it hard for employees to provide service with a smile at a time when the key differentiator of a service or product is the manner in which it is provided Are staff becoming emotional labourers Online support materials at [www.booksites.net](http://www.booksites.net) For instructors a password accessed Instructor *Organizational Behaviour* Andrzej Huczynski, David A.
