Organic Structure Analysis:

Organic Structure Analysis Phillip Crews, Jaime Rodríguez, Marcel Jaspars, Rodriguez Jaspars Crews, Professor of Organic Chemistry Jaime Rodriguez, 1998 The text's major aim is to show how spectra can be efficiently examined in order to identify a molecule's major structural elements

Organic Structure Analysis Phillip Crews, Jaime Rodriguez, Marcel Jaspars, 2010-10-28 Organic Spectroscopy is a standard chemistry course offered each year to large numbers of seniors and beginning graduate students They learn to efficiently solve problems of molecular structure determination by an integrated use of four primary spectroscopic methods NMR mass spectrometry infrared and ultraviolet The problem solving approach used in the second edition follows the actual information flow used by practitioners solving molecular structures and not the standard methods based approach used in other texts In the ten years since the last edition published there have been significant changes in spectroscopic instrumentation and these are reflected throughout this text New sections have been included where the first edition omitted coverage and all chapters are updated with the most recent developments in the field Major changes have been made in the pivotal chapters covering multipulse 1D and 2D nuclear magnetic resonance methods and the chapters covering mass spectrometric methods have been split from two into three to increase content on modern MS methodology As examples in NMR selective pulses and their uses 15N 2D methods and computer assisted structure elucidation has been included and there is now a section on NOESY and ROESY For MS the three chapters cover core techniques and ionization processes small and large molecule analysis and fragmentation processes A hallmark of this text is the focus on chemical structure and the text revolves around how relevant information regarding skeleton functional groups and stereochemistry can be derived and the benefits/disadvantages of particular approaches The straightforward writing style and use of illustrative examples clearly reproduced spectra and a large number of problems make this text more accessible than ever

Organic Spectroscopic Structure Determination Douglass F. Taber, 2007

Organic Spectroscopic Structure Determination is a sophomore level book with emphasis on structure problem solving. It consists of four sections that attempt to engage the imagination of the student. Taber has arranged the material in such a way that the students can work the problems and learn the procedures on their own minimizing the time taken in lecture. The first section contains three chapters of instruction on the methods of organic spectroscopy. The second contains fifty problems with just data sets of spectroscopic data. The third section is comprised of fifty problems that show starting materials and reaction conditions with spectroscopic data for the product. The final section includes tables of spectroscopic data.
