*Installing Oracle 11gR2 RAC on Linux on System z* Terry Elliot, David Simpson, IBM Redbooks, 2011-11-22 This IBM Redpaper™ publication describes experiences gained while installing Oracle Database 11gR2 with Grid Infrastructure (GI). It covers the set up and installation process for these environments. Setting up Red Hat Enterprise Linux 5 with DASD. Setting up Red Hat Enterprise Linux 5 with FCP SCSI. Setting up SLES11 with DASD. Setting up SLES11 with FCP SCSI disks. Examples include the installation of the Grid Infrastructure, installation of a single instance database, and installation of a two node Real Application Cluster (RAC) database. In all cases we use UDEV rules for DASD and single path SCSI and multipathing for multi-path SCSI to provide device consistency for ASM storage, not ASMLib. Interested readers would include database consultants, installers, administrators, and system programmers. This is not meant to replace Oracle documentation, but to supplement it with our experiences while installing and using Oracle Database products. We made extensive use of My Oracle Support notes.
