Drug Delivery Across Physiological Barriers Silvia Muro,2016-04-27 Transport of pharmaceutical agents in the body is paramount to therapeutic efficacy Advances in the past decades have rendered a remarkable improvement of drug delivery strategies which has helped to increase the bioavailability of therapeutic agents by protecting them from degradation targeting them to diseased sites and controlling their circ

Oral Bioavailability and Drug Delivery Ming Hu,Xiaoling Li,2024-01-09 ORAL BIOAVAILABILITY AND DRUG DELIVERY Improve the performance and viability of newly developed and approved drugs with this crucial guide Bioavailability is the parameter which measures the rate and extent to which a drug reaches a user s circulatory system depending on the method of administration For example intravenous administration produces a bioavailability of 100% since the drugs are injected directly into the circulatory system in the case of oral administration however bioavailability can vary widely based on factors which if not properly understood can result in a failure in drug development adverse effects and other complications The mechanics of oral bioavailability are therefore critical aspects of drug development Oral Bioavailability and Drug Delivery provides a comprehensive coverage of this subject as well as its drug development applications Beginning with basic terminology and fundamental concepts it provides a thorough understanding of the challenges and barriers to oral bioavailability as well as the possibilities for improving this parameter The resulting book is an indispensable tool for drug development research Oral Bioavailability and Drug Delivery readers will also find Discussion questions in many chapters to facilitate comprehension Detailed discussion of topics including dissolution absorption metabolism and more Real world examples of methods in actions throughout Oral Bioavailability and Drug Delivery is ideal for pharmaceutical and biotechnology scientists working in drug discovery and development researchers in chemistry biology pharmacology immunology neuroscience and other related fields and graduate courses in drug development and delivery

Therapeutic Drug Targets and Phytomedicine For Triple Negative Breast Cancer Acharya Balkrishna,2023-01-13 Triple negative breast cancers TNBC are a biologically

aggressive form of breast cancer and constitute approximately 10-15% of all breast cancer patients. Distant metastasis, lack of clinically targeted therapies and prognostic markers makes the disease difficult to treat. Till now not much work has been carried out on this deadly disease. This book provides an overview of TNBC etiology, its treatment strategies and prognostic markers to identify the outcome of standard therapies. Signalling pathways, namely cell proliferation, angiogenesis, invasion and metastasis, apoptosis, autophagy and others involved in complicating the disease have been described in the chapters to convey an understanding about the disease mechanisms. All the possible drugs, either in pre-clinical or clinical stages, have also been mentioned with data that depicts their efficiency in targeting altered genes. The book also introduces the reader to herbal medicine exhibiting high potency to target TNBC, their synthetic analogs used during chemotherapy and their ability to fight against chemoresistance. The concept of phytonanotechnology has also been discussed. The book helps create awareness among a broad range of readers about TNBC. It points to prioritizing the upgradation of health care facilities and re-designing future treatment strategies to provide maximum benefit to breast cancer patients.

Bioavailability of Organic Chemicals in Soil and Sediment Jose Julio Ortega-Calvo, John Robert Parsons, 2020-10-15 This book discusses bioavailability concepts and methods summarizing the current knowledge on bioavailability science as well as possible pathways for integrating bioavailability into risk assessment and the regulation of organic chemicals. Divided into 5 parts, it begins with an overview of chemical distribution in soil and sediment as well as the bioavailability and bioaccumulation of chemicals in plants, soil, invertebrates and vertebrates including humans. It then focuses on the impact of sorption processes and reviews bioavailability measurement methods. The closing chapters discuss the impact of bioavailability studies on chemical risk assessment and highlights further research needs. Written by a multi-disciplinary team of authors, it is an essential resource for scientists in academia and industry, students as well as for authorities.

Nanotechnology Based Delivery of Phytoconstituents and Cosmeceuticals Deep Pooja, Hitesh Kulhari, 2024-01-10 This book explores the role of nanotechnology in the delivery of natural phytoconstituents and cosmeceuticals.
