**The Dragon and the Dazzle** Marco Pellitteri, Jean-Marie Bouissou, Gianluca Di Fratta, Cristiano Martorella, Bounthavy Suvilay, 2010 In the worldwide circulation of the products of cultural industries an important role is played by Japanese popular culture in European contexts Marco Pellitteri shows that the contact between Japanese pop culture and European youth publics occurred during two phases By use of metaphor the author calls them the Dragon and the Dazzle The first took place between 1975 and 1995 the second from 1996 to today They can be distinguished by the modalities of circulation and consumption re elaboration of Japanese themes and products in the most receptive countries Italy France Spain Germany and across the ocean the United States During these two phases several themes have been perceived in Europe as rising from Japan's social and mediatic systems Among them this book examines the most apparent from a European point of view the author names them machine infant and mutation visible mostly through manga anime videogames and toys Together with France Italy is the European country that in this respect has had the most central role There Japanese imagination has been acknowledged not only by young people but also by politicians television programmers the general public educators comics and cartoons authors The growing influence of Japanese pop culture connected to the appreciation of its manga anime toys and videogames also urges political and mediologic questions linked to the identity issues of Japan as they are understood wrongly or rightly in Europe and the West and to the increasingly important role of Japan in international relations Back cover

*Polyptych: Adaptation, Television, and Comics* Reginald Wiebe, 2021-09-07 Through each of its chapters Polyptych Adaptation Television and Comics examines the complex dynamics of adapting serialized texts The transmedial adaptation of collaborative and unstable texts does not lend itself to the same strategies as other more static adaptations such as novels or plays Building off the foundational work of Linda Hutcheon and Gerald Genette Polyptych considers the analogy of adaptation as a palimpsest a manuscript page that has been reused leaving traces of the previous work behind as needing to be

reevaluated A polyptych is a multi panel artwork and provides a new model for analyzing how adaptation works when translating collaborative and unstable texts Given that most television and comic books are episodic and serialized and considering that both media are also the cumulative work of many artists this book offers a series of distanced readings to reassess how adaptation works in this field Comic book adaptations on television are plentiful and are nearly completely ignored in critical discussions of adaptation This collection focuses on texts that fall outside the most common subjects of study among the corpus and contributes to expanding the field of inquiry The book features texts that are subjects of previous academic interest as well as studies of texts that have never before been critically considered It also includes an appendix that provides the first list of comic book adaptations on North American television Polyptych is a unique and timely contribution to dynamic and growing fields of study The book will be of interest to scholars and researchers in the fields of Comic Studies Adaptation Studies and Critical Media Studies more broadly as well as to students undertaking courses on these subjects It will also appeal to comic book and pop culture fans who wish to expand their knowledge on the subject
