Installation Instructions
"CS" Control P/N A42025

MORSE
CONTROLS
MOORE INDUSTRIES, INC.
MOORE
21 Green Street
Wadsworth, Ohio 44266

(Push or Pull to Go Forward;
 Push or Pull to Open Throttle)

USE WITH TYPE 33-C "RED-JAKET" CABLES

INTRODUCTION

These instructions, when used with the appropriate clutch and throttle connection kit instructions, provide complete information for installing, adjusting, operating and maintaining a Morse "CS" control system.

The side-mounted Model "CS" provides remote control of both clutch and throttle for engines equipped with hydraulic transmissions. The Morse "Red-Jaket" push-pull cables which connect the control head to the engine and transmission are engineered specifically for use with Morse controls to assure smooth, instant response to movement of the control levers.

When determining the length of cables, choose the most direct path from the control head to the carburetor and clutch levers. Bends in the cable path must not be smaller than 8" radius.

EQUIPMENT REQUIRED

1. One "CS" control
2. Two 33-C "Red-Jaket" push-pull cables
3. One clutch connection kit
4. One throttle connection kit

INSTALLATION

1. Locate and Mount Control Head
 - a. The "CS" can be mounted on either the right or left side of wheel box, panel, etc.
 - b. Adequate clearance must be provided to allow the hand levers to move through their full ranges. Be sure there is ample space behind the mounting surface for the cable hanger plate and an unobstructed path for the push-pull cables. (See Figure 1)
 - c. The hanger plate may be installed in any of the four positions shown in Figure 2 to provide the most direct cable path.
 1. Cut or drill a 1-1/2" diameter hole in the mounting surface at the control

head location. The mounting surface must be 13/16" thick. Add shims, if necessary, to achieve this thickness.

2. Remove screw (22), washer (21), throttle arm (24), nut (19), washer (20), bolt (28) and clutch arm (27).

Refer to exploded view, page 2.

3. Insert control assembly in mounting hole and using housing (7) as a template, drill four (13/64) holes for mounting screws.
4. Using screws (33), washers (31) and nuts (30) secure the control and hanger plate to the mounting surface in the position chosen. The mounting surface must be 13/16" thick for proper installation. Use shims, if necessary, to achieve this thickness.

FIGURE 1

2. Push-Pull Operation Variations

- a. It may be necessary to reposition the clutch and/or the throttle arm of the control to fit the requirements of your engine and transmission. Refer to Figure 3.
