Rowland, 2026-01-27 This book introduces a new methodology for understanding videogames with particular attention to three types of videogames toy games storybook games and ludonarratives This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative This book explores the idea of storyplaying in connection with new ideas on intramersive movement game mechanics and sacred play to develop a typology of videogames that will enable critics educators and theorists to situate videogames within a broad continuum of literary history Building on this foundation this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism the emerging art world of game mediated photography the various economies constructed around videogames the potential of games to serve as third places and some suggestions for videogames in the classroom These ideas are contextualized by the author s argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces with dedicated and important meditation which given today s decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises **EDUCATION 6.0**

KHRITISH SWARGIARY, 2026-01-01 As the author of *Education 6.0 Envisioning the Symbiotic Future of Learning and Innovation* I am profoundly humbled and inspired to present this work at a pivotal moment in human history We stand on the threshold of an era defined by unprecedented technological convergence where artificial intelligence quantum computing bio digital interfaces and regenerative systems are reshaping not only industries but the very essence of how we learn create and coexist with intelligent machines *Education 6.0* as envisioned in these pages represents a bold forward looking paradigm that

extends beyond the human centric resilience of Education 5.0 and Industry 5.0. It embraces a symbiotic future in which humans and advanced technologies co-evolve ethically, sustainably, and equitably to address grand challenges like climate crises, skill obsolescence, and global inequities. This book emerges from my deep passion for educational transformation, informed by years of research into emerging technologies, pedagogy, and policy. Drawing on historical trajectories from ancient gurukuls and hierarchical rote systems to the digital integrations of Education 3.0 and 4.0, I propose Education 6.0 as a holistic framework aligned with the nascent visions of Industry 6.0. Central to this is the original LIKEMS framework: Leadership, Innovation, Knowledge, Skills, Industry, Manufacturing, Maker-Centered Practices, Entrepreneurship, and Sustainability, designed to cultivate sovereign learners who lead ethical innovation, harness symbiotic intelligence, and steward planetary resources. Written amid rapid advancements as of late 2025, this volume synthesizes empirical evidence, real-world implementations, and speculative yet rational projections to guide educators, policymakers, researchers, and innovators. My hope is that it sparks collaborative action toward learning ecosystems where technology amplifies human potential without diminishing agency, empathy, or well-being. Education 6.0 is not merely an adaptation to change; it is a call to co-create a harmonious, innovative world for generations to come. KHRITISH SWARGIARY AKA KS LUMINAR ASSAM INDIA JAN 2026

How Video Games Made the Metaverse Kelly Vero, 2026-01-22. This book offers an unflinching look at the creative and structural challenges of storytelling in interactive media. Drawing on over 30 years of industry experience, Kelly Vero explores the rich interplay between narrative design and technology, making the case for why story far from being a cosmetic layer is foundational to player engagement, emotional investment, and lasting value in games and virtual worlds. The book unpacks how narrative design works across different genres and platforms, from AAA games and sandbox titles to immersive metaverses, offering a toolkit of questions and techniques to help creators build experiences that resonate. Vero brings the reader inside the design process, examining iterative workflows, empathy versus hypothesis testing, and the importance of building for diverse, evolving user bases. She draws from case studies including *The Legend of Zelda*, *BTS Universe Story*, *Final Fantasy XIV*, and even *RuneScape*'s infamous party hat, showing how stories are told not just through dialogue but also through User Interface (UI) environment mechanics and player choice. Crucially, *How Video Games Made the Metaverse: From Pixels to Portals* is about building worlds that people want to live in. Whether you're a product lead, a writer, or a designer, this book explores how to integrate content, interaction, and community into a unified whole. It challenges creators to abandon ego-led development and instead embrace deep user understanding as the compass for creative direction. By the end, readers will understand how to apply storytelling techniques not only to games and metaverses but also to digital products more broadly, from loyalty programmes and education platforms to virtual retail and Artificial Intelligence (AI) companions. Vero's reflections on narrative purpose and legacy offer a roadmap for creating digital experiences that matter, not just ones that entertain.
