Employment Is Dead Deborah Perry Piscione, Josh Drean, 2025-01-28 With disruptive technologies on the horizon traditional employment models are becoming outdated. How will your organization adapt to the evolving landscape of work? Business is on the cusp of a profound transformation. Conventional work models are failing to adapt to the evolving needs and expectations of the modern workforce. Simultaneously the emergence of disruptive technologies such as artificial intelligence coupled with web3 innovations including the metaverse and decentralized work models is unlocking a new realm of possibilities. It raises the question Is the era of traditional employment over? The tools of tomorrow will amplify human potential from collaborating in virtual spaces through digital avatars to managing transactions transparently on blockchain. Those who embrace these technologies and the ways people want to work will unleash unprecedented levels of productivity and innovation. But those

who don't risk losing out on the best talent and even becoming obsolete. Employment Is Dead ventures into unexplored territories to reveal how these innovations can transform work into more democratic, human centric and empowering work experiences. Deborah Perry Piscione and Josh Drean bring to life the seismic shifts occurring in the workforce propelled by employees' growing demand for autonomy, flexibility and a sense of purpose in their work. The authors challenge leaders to embrace these changes, offering vital insights into navigating this new landscape. With compelling case studies and cutting edge examples, this book is an essential read for those aiming to stay ahead in a rapidly evolving digital environment and harnessing disruptive technologies to redefine the future of work.

Using the Metaverse in Education Upendra Embranthiri, 2024-12-15 *Using the Metaverse in Education: A Practical Guide* explores the transformative potential of the metaverse in education. This book defines four types of metaverses and examines their pedagogical applications and limitations. The Metaverse Roadmap categorizes these applications into Augmented Reality AR, Anatomy Methodologies and Virtual Reality VR. We delve into real world examples such as AR T-shirts in medical education that allow students to explore the human body and a spinal surgery platform developed by Seoul Hospital using AR technology. The book highlights the potential of the metaverse as a new educational environment offering immersive experiences and enhanced social communication. However, the book also addresses potential challenges such as weak social connections, privacy concerns and the risk of crimes due to anonymity in virtual spaces. We emphasize the importance of carefully analyzing how students understand the metaverse and designing classes that encourage creative problem solving and collaboration. *Using the Metaverse in Education: A Practical Guide* is a comprehensive resource for educators looking to harness the metaverse's potential while mitigating its challenges.

Power On Ash Brandin, 2025-08-26 *From The Gamer Educator* is an openminded guide to parenting alongside screens and gaming, offering practical solutions to managing your family's screen time. Parents are feeling mounting pressure to minimize screen time but are struggling to do so in our technologically driven world. In contrast to the fear and pressure parents are facing, Ash Brandin's *Power On* offers a calm and reassuring message that keeps the wellbeing of the whole family in mind. *Power On* powerfully reframes our current dialogue around technology, beginning with the morality placed on screen time and leisure and the systemic factors contributing to it. Brandin replaces fear with empowerment, giving caregivers tools and strategies for safely incorporating tech into their children's lives, guiding children to having a healthy relationship with screens with easy to implement approaches such as The ABCs of the Screen Time Management Elements: Access, Behavior, Content, The Managing Online Safety S T A R Settings, Time, Ads, App Store, Restriction, The N I C E Screen Time Boundaries, Needs, Input, Consistent, Enforceable, And several other sets of steps, tools and strategies to understand, manage and effectively utilize tech in parenting. With today's parenting advice being awash with unhelpful negative judgements on screens and little realistic actionable advice, Ash Brandin provides timely, realistic direction that will empower readers to find a balance with screen time that works for the entire family.

Regulating the Metaverse Ignas Kalpokas,Julija Kalpokienė,2023-01-26 The metaverse seems to be on everybody's lips and yet very few people can actually explain what it means or why it is important This book aims to fill the gap from an interdisciplinary perspective informed by law and media and communications studies Going beyond the optimism emanating from technology companies and venture capitalists the authors critically evaluate the antecedents and the building blocks of the metaverse the design and regulatory challenges that need to be solved and commercial opportunities that are yet to be fully realised While the metaverse is poised to open new possibilities and perspectives it will also be a dangerous place one ripe with threats ranging from disinformation to intellectual property theft to sexual harassment Hence the book offers a useful guide to the legal and political governance issues ahead while also contextualising them within the broader domain of governance and regulation of digital technologies
