B. Chan, 2025-02-17 This book is a global reflection on disparate religious and philosophical approaches to questions of AI and the particular ways these questions affect East Asian societies These chapters originate from a conference held at Hong Kong Baptist University in April 2023 on Ethical and Social Issues in AI East Asia and Beyond Sections cover Confucianist Daoist and Christian reflections on AI ethics Chapters on broad theoretical questions that AI poses are included as well as those addressing issues in applied AI ethics This volume appeals to students and researchers working across cultures and traditions on the philosophy of AI technology *Organizing for Generative AI and the Productivity Revolution* Arthur J. O'Connor, 2024-11-07 As leaders plan to make significant investments to harness the power of foundational models such as ChatGPT they need to understand the changes in organizational behaviors required for the successful implementation of such systems The size complexity and nature of this new wave of technologies requires a refresh in roles and responsibilities in conventional IT organizations This book reveals practical and no nonsense guidance on how to leverage generative AI to

transform your business processes and organizational structures to achieve breakthroughs in efficiency effectiveness and competitive advantage Written in a lively engaging and often humorous style this work provides practical insights and timely survival skills for leaders with anonymous but real world experiences and case studies If you re looking to understand how large language foundation models such as ChatGPT are reshaping managerial roles and organizational structures and how they can leverage this knowledge to survive and thrive in this brave new world then Organizing for Generative AI and the Productivity Revolution is the book for you What You Will Learn Review the key changes in current state roles and responsibilities that are required to successfully deploy generative AI systems Examine the organizational reporting structures and associated incentives that form a strong generative AI system Understand the financial regulatory and operational risks created by organizational behavioral issues that arise when organizations build and deploy large language models Compare the strategic differences in emerging versus traditional organizational behaviors incentives roles and responsibilities Who This Book Is For Executives and team leaders at enterprises large and small The book addresses an important topic how to set up an organization for success particularly in Generative AI Generative AI brings new challenges to organizations in terms of how to structure the organization for success mitigating risks software development lifecycle and tracking ROI I could think of no better person to tackle these issues than Arthur O Connor who has extensive experience in technology within some of the largest enterprises in Wall Street complemented by his academic background He brings an insightful and unique perspective for technology leaders who want to set up their organizations for success in Generative AI Joseph Sabelja Generative AI Firmwide Platform Lead J P Morgan

Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book

concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future **Controversial Encounters in the Age of Algorithms** Sine N.

Just,2024-11-27 How can we have meaningful public conversations in the algorithmic age This book explores how digital technologies shape our opinions and interactions often in ways that limit our exposure to diverse perspectives and fuel polarization Drawing on the ancient art of arguing all sides of a case the book offers a way to revive public debate as a source of trust and legitimacy in democratic societies This is a timely and urgent book for anyone who cares about the future of democracy in the digital era *Artificial Intelligence in Dermatology, An Issue of Dermatologic Clinics* Jonathan
