to achieve the SDGs the book puts a premium on decoloniality in AI systems and democratising AI technology Provides a critique of the current SDGs approach by reframing the goals as a comprehensive risk assessment of humanity s most pressing threats in the 21st century Features broad and holistic interventions to accelerate the attainment of the SDGs Provides a comprehensive but accessible introduction to AI concepts and advanced innovations such as AlphaFold ChatGPT 4 DeepSeek R1 Grok 3 and autonomous vehicles drones and driverless cars Discusses the AI strategies of leading economies and assesses the impact of AI on geopolitics Provides a comprehensive critique of global AI efforts by the UN and African Union while proffering alternative paradigms and frameworks Presents the enablers drivers and strategic framework of AI deployment to achieve the SDGs Develops and presents details of six distinct but related components of a novel Strategic Framework for developing and adopting AI Vision Strategy Policy Governance Legislation Regulations and Implementation Matrix Outlines specific ways that AI can be deployed to achieve each of the 17 SDGs and reviews seven countries experiences Explores an innovative forward looking and technology driven framework for equitable global socio economic transformation to succeed the SDGs post 2030 *The New Fire* Ben Buchanan,Andrew Imbrie,2024-03-05 AI is revolutionizing the world Here s how democracies can come out on top Artificial intelligence is revolutionizing the modern world It is ubiquitous in our homes and offices in the present and most certainly in the future Today we encounter AI as our distant ancestors once encountered fire If we manage AI well it will become a force for good lighting the way to many transformative inventions If we deploy it thoughtlessly it will advance beyond our control If we wield it for destruction it will fan the flames of a new kind of war one that holds democracy in the balance As AI policy experts Ben Buchanan and Andrew Imbrie show in The New Fire few choices are more urgent or more fascinating than how we harness this technology and for what purpose The new fire has three sparks data algorithms and computing power These components fuel viral disinformation campaigns new hacking tools and military weapons that once seemed like science fiction To autocrats AI offers the prospect of centralized control at home and asymmetric advantages in combat It is easy to assume that democracies bound by ethical constraints and disjointed in their approach will be unable to keep up But such a dystopia is hardly preordained Combining an incisive understanding of technology with shrewd geopolitical analysis Buchanan and Imbrie show how AI can work for democracy With the right approach technology need not favor tyranny *Artificial Intelligence for Strategic Communication* Karen E. Sutherland,2025-02-17 In an era where AI is revolutionising every aspect of communication this groundbreaking research monograph provides an essential roadmap for navigating the intersection of artificial intelligence and strategic communication Drawing on extensive primary research including interviews with 41 experts and surveys of 400 professionals across three continents and eight countries this book provides insights from relevant scholars communication practitioners and AI tool developers This comprehensive guide combines scholarly rigour with practical application presenting a data informed Model for Practice that helps to withstand the constant evolution of AI

technology Each chapter delivers research informed actionable tools relating to the multifaceted field of strategic communication including ethical practice strategy development content creation evaluation and continuous improvement Bridging the gap between theoretical understanding and practical implementation AI for Strategic Communication is an invaluable resource for strategic communication scholars students and practitioners essential for advancing careers in the age of AI This work emerged from the need for a comprehensive source combining scholarly practitioner and AI developer perspectives on strategic communication from around the globe The application of new technologies such as new vaccines, therapeutic cytokines and antibodies, and antiviral drugs in the prevention and treatment of animal infectious diseases Guoxin Li,Lingxue Yu ,Jin Cui,2025-12-05 The outbreak of the epidemic has continuously refreshed human understanding of various pathogens and the pandemic of infectious diseases has caused more serious damage to human public health and socio economic development Up to now there is no specific antiviral drug for most viral infections and vaccination is the excellent weapon to effectively control epidemics and even eliminate infectious diseases However due to the strong mutation ability of viruses especially RNA viruses and the insufficient research on the pathogenic mechanism and immune mechanism of viral infections the application of traditional vaccine technology may not be effective in dealing with new pathogens with no characteristics In addition traditional vaccines also have disadvantages such as high preparation costs long research and development cycles and may not induce protective responses Based on the above facts establishing a new vaccine technology and a universal vaccine technology platform that can quickly develop and produce a large number of affordable vaccines has become an urgent research topic to be solved In recent years with the continuous development of science and technology various new technologies have developed rapidly This Research Topic will focus on the widespread application of new technologies such as targeted attenuated vaccine technology genetic engineering vaccines peptide antigen vaccines viral vector vaccines nucleic acid vaccine technology new adjuvant technologies the development of therapeutic cytokines and antibodies as well as antiviral drugs providing new hope and choices for the prevention and treatment of various animal diseases We welcome you to provide relevant research articles comments and original research
