**Animals That Stay Cool in the Summer**

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Summer is a warm and sunny time of year, but it can get very hot—just like people! But for animals, dogs, lizards, humans, use fans, wear hats, and drink cool water... animals have their own smart ways to stay cool and safe when the temperatures rise.

Let's start with one of the largest land animals—the elephant! Elephants live in very hot places like Africa and India. They have big ears, and those ears help them cool down! Blood flows through their ears, and when elephants flap them, they can cool the blood. This helps their whole body feel cooler! Elephants also love to spray themselves with water using their trunks. Sometimes, they roll in mud. The mud acts like sunscreen and keeps bugs away, too!

Dogs also have special ways to cool off! Unlike people, dogs don't sweat through their skin. Instead, they pant, sticking out their tongues and breathing fast. This helps cool the air going into their bodies. On hot days, dogs may lie down in shady spots, drink lots of water, or even jump into a pool if one is nearby!

Some animals that live in hot deserts, like lizards, once used to warm weather, but now they need to take breaks from the heat. Lizards are cold-blooded, so they soak up the sun to stay warm, but if the ground gets too hot, they hide in the shade. They crawl under rocks, logs, or leaves to keep cool during the hottest part of the day.

Birds have feathers that can keep them warm, but what do they do when it's hot? Birds often rest quietly in trees during the heat. Some birds open their beaks to release heat—kind of like panting! Others take dust baths or splash in puddles, and birds bathe in cool water. If you've ever seen a bird shaking its wings and hopping in water, it's trying to cool down on a hot day.

Even animals that live in the ocean feel the summer heat. Some fish swim to deeper, cooler water when the top of the ocean gets warm. Seals and sea lions often rest on shady rocks or take dips in the water to keep their bodies from getting too hot. Animals in the ocean don't have air conditioning, but the deeper water works just as well!

From the hot desert to the wide ocean, animals all over the world have their own special ways to stay cool. Whether it's flipping ears, panting tongues, hiding in shade, or splashing in water, animals are smart about keeping themselves safe during the summer heat.
