Choose a regular time of the day/night when you go to bed and wake up each day.

## **KEEP YOUR ROOM COOL**

Colder rooms help you fall asleep faster and maintain a deeper sleep.

## **KEEP YOUR ROOM DARK**

Sleeping in a dark room reduces the stimulation of light telling your body to be active.

Turn off electronic devices 30-60min before bed to reduce the stimulation of blue light.

## **EXERCISE**

**Hacking Neuroplasticity** Joyce Shaffer, 2024-11-29 Neuroplasticity is the ability of neural networks in the brain to change through growth and reorganization. It is when the brain is rewired to function in some way that differs from how it previously functioned. How does aging affect neuroplasticity? As we grow older, plasticity decreases to stabilize what we have already learned. What influence does the aging process have on memory? Forgetfulness can be a normal part of aging. As people get older, changes occur in all parts of the body, including the brain. As a result, some people may notice that it takes longer to learn new things, they don't remember information as well as they did, or they lose things like their glasses. This book on evolving neuroscience is unique in its lifespan focus on driving neuroplasticity in a positive direction to influence the Flynn effect of increasing human intelligence as the preferred way to prevent delay onset and/or reverse dementia. It considers potential impact from the first moments of life through end of life. It includes intergenerational activities. Its inclusion of centenarians and supercentenarians provides examples of Super Agers who have maintained and/or increased neurocognitive capacity, often with a health span that approximated their vigorous longevity. It discusses the use of the Artificial Intelligence (AI) revolution to refine, personalize, and broaden our global reach to enhance the Flynn effect as the preferred effort to improve global statistics on neurocognitive functioning at any age. Driving neuroplasticity in a positive direction at all ages is urgent. With this book's focus on evidence-based interventions at any age, which can have physical, emotional, neurobiological, neurochemical, immunological, and social health benefits, it is a unique overview and application of evolving neuroscience to address the UN WHO Decade of Action for Healthy Ageing for All. *Profiling Hackers* Raoul Chiesa, Stefania Ducci, Silvio Ciappi, 2008-12-11 Complex and controversial hackers possess a wily, fascinating talent; the machinations of which are shrouded in secrecy. Providing in-depth exploration into this largely uncharted territory, *Profiling Hackers: The Science of Criminal Profiling as Applied to the World of Hacking* offers insight into the hacking realm by telling attention-grabbing tales about bizarre characters that practice hacking as an art. Focusing on the relationship between technology and crime and drawn from the research conducted by the Hackers Profiling Project (HPP), this volume applies the behavioral science of criminal profiling to the world of internet predators. The authors reveal hidden aspects of the cyber crime underground, answering questions such as: Who is a real hacker? What life does a hacker lead when not on line? Is it possible to determine a hacker's profile on the basis of his behavior or types of intrusion? What is the motive behind phishing, pharming, viruses, and worms? After gaining notoriety for breaking into many high-profile computer systems, the Italian hacker Raoul Chiesa turned to ethical hacking in 1995. Today he uses his skills and abilities to find ways to protect networks and computer systems. Stefania Ducci is a member of the Counter Human Trafficking and Emerging Crimes Unit at the United Nations Interregional Crime and Justice Research Institute (UNICRI). Silvio Ciappi is a criminologist who lectures at the University of Pisa and studies criminal profiling. These three experts with vastly different backgrounds explore the

clandestine network of cyber criminals providing an unparalleled glimpse into the secret lives of these malevolent individuals
