Cybernetic Circulation Complex Nick Dyer-Witheford, Alessandra Mularoni, 2025-02-11 An anti capitalist guide to breaking the power of Big Tech Big Tech firms dominate the global economy But what value do they actually produce In this brilliant survey of global tech economy Nick Dyer Witheford and Alessandra Mularoni argue that the role of firms like Amazon and Google Palantir and Uber is in the automation of circulation By applying digital technologies to processes of market exchange everything from advertising and shopping to logistics and financial services Big Tech aims to subject these activities to the level of control and predictability that capital has secured in industrial production But there is a way out of the multiple crises that Big Tech has helped precipitate If we are to break their grip on the global economy then it ll take more than just antitrust legislation or reducing individual time online By understanding the central role Big Tech plays in contemporary capitalism Dyer Witheford and Mularoni argue that what is required instead is a new ambitious and comprehensive program of democratic collective planning that can move us beyond capitalism Cybernetic Circulation Complex offers not only a compelling analysis of the power of Big Tech and their role in our current global crises but a roadmap for a new form of life biocommunism a digital degrowth that can help us steer between the double boundaries of ecological sustainability and equitable social development

Routledge Companion to Creativity and the Built Environment Julie T. Miao, Tan Yigitcanlar, 2024-03-29 This book crtically examines the reciprocal relationship between creativity and the built environment and features leading voices from across the world in a debate on originating learning modifying and plagiarizing creativities within the built environment The Companion includes contributions from architecture design planning construction real estate economics urban studies geography sociology and public policies Contributors review the current field and proposes new conceptual frameworks research methodologies and directions for research policy and practice

Chapters are organised into five sections each drawing on cross disciplinary insights and debates Section I connects creativity productivity and economic growth and examines how our built environment stimulates or intimidates human imaginations Section II addresses how hard environments are fabricated with social cultural and institutional meanings and how these evolve in different times and settings Section III discusses activities that directly and indirectly shape the material development of a built environment its environmental sustainability space utility and place identity Section IV illustrates how technologies and innovations are used in building and strengthening an intelligent real time responsive urban agenda Section V examines governance opportunities and challenges at the interface between creativity and built environment An important resource for scholars and students in the fields of urban planning and development urban studies environmental sustainability human geography sociology and public policy *General Linguistics*, 1998 *Hellworld: The Human Species and the Planetary Factory* Phil Neel, 2025-07-24 Hellworld examines the megastructures of global capitalism asking how revolutionary subjectivity might emerge within and against capital's domesticating force Central to this inquiry is the planetary factory the global value chains connecting disparate industrial territories the rise of China the fragmentation of global trade and above all the simultaneous deagrarianisation and deindustrialisation of labor These structural shifts are linked to subjective forces exploring how social divisions shape resistance Through an analysis of uprisings in Hong Kong Thailand Sudan and beyond Hellworld considers whether this system inescapable as it seems can perhaps be destroyed
