*Successful Business Model Transformations in Disruptive Times* Thomas Rudolph, Markus Schweizer, 2024-06-17 The authors offer solutions for established corporations facing disruptive challenges. Based on extensive research and discussion a unique management approach the High 5 approach has been developed to promote successful self disruption in established corporations. At the center of this approach is the transformation of the core business. The book supports the idea of permanent self disruption as the key to success for established players. *Successful Business Model Transformations in Disruptive Times* is aimed at the management of various industries. This book provides managers in established corporations with a theoretically sound and practical guide.

**Amorphous Oxide Semiconductors** Hideo Hosono, Hideya Kumomi, 2022-05-31 *AMORPHOUS OXIDE SEMICONDUCTORS* A singular resource on amorphous oxide semiconductors edited by a world recognized pioneer in the field. In *Amorphous Oxide Semiconductors: IGZO and Related Materials for Display and Memory* the Editors deliver a comprehensive account of the current status of and latest developments in transparent oxide semiconductor technology. With contributions from leading international researchers and exponents in the field this edited volume covers physical fundamentals, thin film transistor applications, processing, circuits and device simulation, display and memory applications, and new materials relevant to amorphous oxide semiconductors. The book makes extensive use of structural diagrams of materials, energy level and energy band diagrams, device structure illustrations and graphs of device transfer characteristics, photographs and micrographs to help illustrate the concepts discussed within. It also includes: A thorough introduction to amorphous oxide semiconductors including discussions of commercial demand, common challenges faced during their manufacture and materials design; Comprehensive explorations of the electronic structure of amorphous oxide semiconductors, structural randomness, doping limits and defects; Practical discussions of amorphous oxide semiconductor processing including oxide materials and interfaces for application and solution process metal oxide semiconductors for flexible electronics; In depth examinations of thin film transistors (TFTs) including the trade off relationship between mobility and reliability in oxide TFTs; Perfect for practicing scientists, engineers and device technologists working with transparent semiconductor systems. *Amorphous Oxide Semiconductors: IGZO and Related Materials for Display and Memory* will also earn a place in the libraries of students studying oxides and other non classical and innovative semiconductor devices. *WILEY SID Series in Display Technology* Series Editor: Ian Sage, Abelian Services, Malvern, UK. The Society for Information Display (SID) is an international society which has the aim of encouraging the development of all aspects of the field of information display. Complementary to the aims of the society the Wiley SID series is intended to explain the latest developments in information display technology at a professional level. The broad scope of the series addresses all facets of information displays from technical aspects through systems and prototypes to standards and ergonomics.
