Intercultural Communication Mai Nguyen-Phuong-Mai,2025-10-01 This book is an introduction to Intercultural Communication IC that takes into account the much neglected dynamic paradigm of culture in the literature. It posits that culture is not static context is the driving force for change and individuals can develop a multicultural mind. It is also the first IC textbook in the field that incorporates insight from evolutionary biology and the newly emerging discipline of cultural neurosciences. Such an interdisciplinary approach provides readers with new angles encourages critical thinking and sometimes challenges conventional knowledge in the field. The combination of the author's multicultural academic and journalistic background contributes to a balance of diverse perspectives and world views on cultural theories and discourses. *Imprint of Action* Krijn H. J. Boom, 2018 Cultural heritage which includes archaeology is recognized as serving an increasingly important role in European societal development. But what exactly is the relevance of archaeology to present-day citizens? Imprint of Action investigates the sociocultural impact of archaeology through public activities. These activities provide an ideal setting for research as they represent a structured point of encounter between the public and archaeological heritage. In analysing them, aspects of people's connections to the past are revealed. As such, this research forms an integral part of the NEARCH project 2013-2018. As a basis for analysis, survey data from three large-scale case studies DOM under Netherlands You R Archaeology, Cross Europe and Invisible Monuments Greece was used. The analysis and interpretation of the case studies is based on a newly created methodological framework which finds its roots in the broader culture and arts sector. Results show that activities encourage participation and interaction which engenders sociocultural impacts on participants most notably in knowledge increase, skill development, social relations and happiness. Imprint of Action is the first large-scale study focussing entirely on sociocultural impact in archaeology and, as such, is explorative in nature. It provides unique insights into the workings of interaction and participation in archaeological events and openly shares qualitative and quantitative research data with the expanding field. In doing so, Imprint of Action lies the foundations for further analysis of the societal impact of both large and small-scale heritage projects and identifies the incontestable values of archaeological heritage to the public.
