Mobile App Ebook ahmad sapuan bin hasan,mahaligam moorthy,2019-04-11 A mobile application most commonly referred to as an app is a type of application software designed to run on a mobile device such as a smartphone or tablet computer Mobile applications frequently serve to provide users with similar services to those accessed on PCs Apps are generally small individual software units with limited function The importance of mobile phones in our everyday life and activities is undeniably unending This is so because there is ongoing tremendous transformation in that mobile phones are no longer the ordinary communication device it used to be It has become the colossal point of attention for individuals and businesses alike courtesy of the various incredible features and opportunities that mobile phones offer On a general note the presence of mobile apps on phones can be likened to be the decorations on a cake because they make mobile phones enjoyable and fun Mobile apps are unlimited in number with usage that cuts across all walks of life and with people wanting more and more of these apps for easy lifestyle and living Presently the use of mobile apps can be seen in areas such as communication education cooking social media shopping business money making matrimony and banking Every day more developers are trying to develop apps either as a hobby or professionally The current challenge for many beginner developers who want to move into the exciting world of mobile apps development is trying to determine where to start and how to learn codings as well Intelligent Computing and Applications B. Narendra Kumar Rao,R.

Balasubramanian,Shiu-Jeng Wang,Richi Nayak,2022-11-13 This book presents novel work of academicians researchers industry professionals practitioners and budding engineers to disseminate the most recent innovations trends and concerns along with the present day challenges and the solving approaches for implementation in the domains of data science intelligent computing and computer networks and security It is a collection of selected high quality research papers from the International Conference on Data Science Intelligent Computing and Cyber Security ICDIC 2020 organized by Sree Vidyanikethan Engineering College Tirupati India during 27 29 February 2020 It discusses the latest challenges and solutions in the field of data innovation data management data analysis data security and intelligent methods and applications

New Technologies, Development and Application III Isak Karabegović,2020-05-04 This proceedings book features papers presented at the International Conference on New Technologies Development and Application held at the Academy of Sciences and Arts of Bosnia and Herzegovina in Sarajevo on 25th 27th June 2020 It covers a wide range of future technologies and technical disciplines including complex systems such as Industry 4.0 patents in Industry 4.0 robotics mechatronics systems automation manufacturing cyber physical and autonomous systems sensors networks control energy and renewable energy sources automotive and biological systems vehicular networking and connected vehicles effectiveness and logistics systems smart grids nonlinear systems power social and economic systems education and IoT The book focuses on the Fourth Industrial Revolution Industry 4.0 in which implementation will improve many aspects of human life in all

segments and lead to changes in business paradigms and production models. Further new business methods are emerging transforming production systems, transport, delivery and consumption which need to be monitored and implemented by every company involved in the global market. **Cognitive Analytics: Concepts, Methodologies, Tools, and Applications**

Management Association, Information Resources, 2020-03-06. Due to the growing use of web applications and communication devices the use of data has increased throughout various industries including business and healthcare. It is necessary to develop specific software programs that can analyze and interpret large amounts of data quickly in order to ensure adequate usage and predictive results. *Cognitive Analytics Concepts Methodologies Tools and Applications* provides emerging perspectives on the theoretical and practical aspects of data analysis tools and techniques. It also examines the incorporation of pattern management as well as decision making and prediction processes through the use of data management and analysis. Highlighting a range of topics such as natural language processing, big data and pattern recognition this multi volume book is ideally designed for information technology professionals, software developers, data analysts, graduate level students, researchers, computer engineers, software engineers, IT specialists and academicians.

*Frontiers in Software Engineering Education* Jean-Michel Bruel, Alfredo Capozucca, Manuel Mazzara, Bertrand Meyer, Alexandre Naumchev, Andrey Sadovykh, 2020-08-11. This book constitutes invited papers from the First International Workshop on Frontiers in Software Engineering Education FISEE 2019 which took place during November 11-13 2019 at the Château de Villebrumier, France. The 25 papers included in this volume were considerably enhanced after the conference and during two different peer review phases. The contributions cover a wide range of problems in teaching software engineering and are organized in the following sections: Course experience, lessons learnt, curriculum and course design, competitions and workshops, empirical studies, tools and automation, globalization of education and learning by doing. The final part TOOLS Workshop Artificial and Natural Tools ANT contains submissions presented at a different but related workshop run at Innopolis University, Russia in the context of the TOOLS 2019 conference. FISEE 2019 is part of a series of scientific events held at the new LASER center in Villebrumier near Montauban and Toulouse, France.
