*Neches River User Guide* Gina Donovan, Stephen D. Lange, Adrian F. Van Dellen, 2009 Maps of towns roads parks and other landmarks along nearly 360 miles of the river s course     [Running the River](#) Wes Ferguson, 2014-03-05 Growing up near the Sabine journalist Wes Ferguson like most East Texans steered clear of its murky debris filled waters where alligators lived in the backwater sloughs and an occasional body was pulled from some out of the way crossing The Sabine held a reputation as a haunt for a handful of hunters and loggers more than a few water moccasins swarms of mosquitoes and the occasional black bear lumbering through swamp oak and cypress knees But when Ferguson set out to do a series of newspaper stories on the upper portion of the river he and photographer Jacob Croft Botter were entranced by the river s subtle beauty and the solitude they found there They came to admire the self described river rats who hunted fished and swapped stories along the muddy water plain folk who love the Sabine as much as Hill Country vacationers love the clear waters of the Guadalupe Determined to travel the rest of the river Ferguson and Botter loaded their gear and launched into the stretch of river that charts the line between the states and ends at the Gulf of Mexico To learn more about The Meadows Center for Water and the Environment sponsors of this book s series please click here     [The Texas Landscape Project](#) David A. Todd, Jonathan Ogren, 2016-06-14 The Texas Landscape Project explores conservation and ecology in Texas by presenting a highly visual and deeply researched view of the widespread changes that have affected the state as its population and economy have boomed and as Texans have worked ever harder to safeguard its bountiful but limited natural resources Covering the entire state from Pineywoods bottomlands and Panhandle playas to Hill Country springs and Big Bend canyons the project examines a host of familiar and not so familiar environmental issues A companion volume to The Texas Legacy Project this book tracks specific environmental changes that have occurred in Texas using more than 300 color maps expertly crafted by cartographer Jonathan Ogren and over 100 photographs that coalesce to fashion a broad portrait of the modern Texas landscape The rich data compiled by author David Todd are presented in clearly written yet marvelously detailed text that gives historical context and contemporary statistics for environmental trends connected to the land water air energy and built world of the second largest and second most populated state in the nation An engaging read for any environmentalist or conscientious citizen The Texas Landscape Project provides a true sense of the grand scope of the Lone Star State and the high stakes of protecting it To learn more about The Meadows Center for Water and the Environment sponsors of this book s series please click here     **River of Redemption** Krista Schlyer, 2018-11-26 Incorporating seven years of photography and research Krista Schlyer portrays life along the Anacostia River a Washington DC waterway rich in history and biodiversity that has nonetheless lingered for years in obscurity and neglect in our nation s capital River of Redemption offers an experience of the river that reveals its eons of natural history centuries of destruction and decades of restoration efforts The story of the Anacostia echoes the story of rivers across America Inspired by Aldo Leopold s classic

book *A Sand County Almanac* Krista Schlyer evokes a consciousness of time and place taking readers through the seasons in the watershed as well as through the river's complex history and ecology As with rivers nationwide the ways we've changed the Anacostia affect the people and wildlife that inhabit its shores from the headwaters in Maryland past its confluence with the Potomac River and ultimately to the Chesapeake Bay Centuries of abuse at the hands of people who have altered the landscape and mistreated the waterway have transformed it into a polluted toxic soup unfit for swimming or fishing The forgotten river is both a reminder of the worst humanity can do to the natural landscape and a wellspring of memory that offers a roadmap back to health and well being for watershed residents human and non human alike Blending stunning photography with informative and poignant text *River of Redemption* offers the opportunity to reinvent our role in urban ecology and to redeem our relationship with this national river and watersheds nationwide
