**Networking -- ICN 2005** Petre Dini, Pascal Lorenz, 2005-03-31 The International Conference on Networking ICN 2005 was the fourth conference in its series aimed at stimulating technical exchange in the emerging and important field of networking On behalf of the International Advisory Committee it is our great pleasure to welcome you to the proceedings of the 2005 event Networking faces dramatic changes due to the customer centric view the venue of the next generation networks paradigm the push from ubiquitous networking and the new service models Despite legacy problems which researchers and industry are still discovering and improving the state of the art the horizon has revealed new challenges

that some of the authors tackled through their submissions

In fact ICN2005 was very well perceived by the international networking community. A total of 651 papers from more than 60 countries were submitted from which 238 were accepted. Each paper was reviewed by several members of the Technical Program Committee. This year the Advisory Committee revalidated various accepted papers after the reviews had been incorporated. We perceived a significant improvement in the number of submissions and the quality of the submissions. The ICN2005 program covered a variety of research topics that are of current interest, starting with Grid networks, multicasting, TCP optimizations, QoS and security, emergency services, and network resiliency. The Program Committee selected also three tutorials and invited speakers that addressed the latest search results from the international industries and academia and reports on findings from mobile satellite and personal communications related to 3rd and 4th generation research projects and standardization.

Vitor Nazário Coelho, Igor Machado Coelho, Thays A. Oliveira, Luiz Satoru Ochi, 2019-05-16 This book presents up to date information on the future digital and smart cities. In particular it describes novel insights about the use of computational intelligence techniques and decentralized technologies covering urban aspects and services, cities governance and social sciences. The topics covered here range from state of the art computational techniques to current discussions regarding drones, blockchain, smart contracts, and cryptocurrencies. The idealization of this material emerged with a journey of free knowledge exchange from a diverse group of authors who met each other through four different events: workshops and special sessions organized with the purpose of boosting the concepts surrounding smart cities. We believe that this book comprises innovative and precise information regarding state of the art applications and ideas for the future of cities and society. It will surely be useful not only for the academic community but also to the industry professionals and city managers.
