assessment is further supported by empirical data collected which is carried out with qualitative and quantitative research methods in order to establish tentative hypotheses based on research phenomena and consumer behaviour pattern In summary mandatory labelling and disclosure requirements do not seem to ruin the credibility of influencer marketing and do not take a major influence on consumer acceptance and behaviour Acceptance and market behaviour rather seem to be driven by other factors including the character of the products and the company involved and the personal fit with the profile of the respective influencers The research project is limited to the consideration of influencer marketing and compliance with legal obligations in Germany
