**Health Promotion in the Universities and Other Educational Settings** Miguel Corbí, Antoni Aguilo, Carmen Gallardo Pino, Mario Del Libano, Carlos Emanuel Rodriguez-Díaz, Hiram V. Arroyo Acevedo, 2025-09-17 The promotion of health in universities is of great importance as it allows for the encouragement of healthy lifestyles and the prevention of diseases among students teaching staff and administrative personnel. The university is a conductive environment for the promotion of healthy habits since firstly it is usually the moment when the students make decisions under their responsibility and secondly it is a place where academic sports and social activities take place so it is also an ideal moment to promote changes that can be transferred to society and the rest of the individual's life. Health promotion in universities can cover several areas such as healthy eating, physical exercise, prevention of addictions, emotional and social mental health among others. It can also involve the entire university community from students to administrative and teaching staff. In the case of students it is essential as it is a period of change and habit formation and the fact that they will be the future decision makers of society. **An**

It is well known the demands and challenges to achieve a mastery elite performance in sport combined with academic commitments. However, studies have reported segmented information on it mostly due to the difficulty of investigating those several aspects that influence the development of a dual career and the perspective of adopting a unidimensional view. Consequently, there is a pressing need to embrace a comprehensive multidimensional view to prepare them for any future that they can be expecting. Such an encompassing perspective is paramount in discerning their requisites and proactively equipping them for the diverse range of future possibilities they may encounter. A singular viewpoint bereft of a holistic purview may engender misapprehensions about their dual career trajectories. In light of this, we want to encourage researchers to combine their knowledge with the practical context lived by millions of student athletes all over the world. Thus, our goal with this special issue is to bring the most recent advances in student athlete dual career and look forward to how all this knowledge can improve student athlete development worldwide from a multidimensional perspective. In order to achieve these goals we encourage manuscripts on any of the following topics: Student athletes dual career transitions, sports policies and legislation on student athletes dual career, sports management on student athletes dual career, psychological measures on student athletes dual career, paralympic student athlete dual career, student athletes dual career programs and environments, student athletes dual career supporters, measures of sport and
