A Typical Year in the NFL

The featured football league, commonly known as the NFL, is the United States' top level American football competition. The league has thirty-two teams and its schedule makes sure to fit two hundred and seventy-two games into very regular seasons. Some of these matchups are now also played in other parts of the world, such as Mexico, the United Kingdom, Germany and South America. In order to keep the league running smoothly, games and events take place throughout the year.

Every year, a total census begins in September and runs for 10 months.

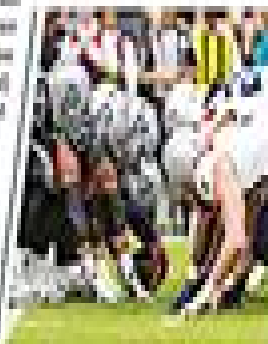

Planning for this year's month's action information is collected by schedule makers as early as the spring to help guide our marketing efforts and locations.

Thousands of computers are used to create different weather scenarios before one is picked that works for your area.

Throughout the regular season, each team will play numerous games, most of them later placed on trading opportunities. Every NFL team will have one "bye week" (when they don't play a game) included in their schedule so players can rest and coaches can recover tactics.

In January, the regular season reaches its end and is followed by the playoffs, when the best teams take part in playoff and championship games. However, the league's highlight and its final game is Super Bowl, which usually takes place in February.
