Blockchain and the Metaverse Upendra Embranthiri, 2024-12-15 *Blockchain and the Metaverse Shaping the Future* is a comprehensive guide exploring how blockchain and the metaverse will change our lives. This book is divided into 16 concise chapters, each offering clear explanations of the metaverse, its evolution, and its impact on various fields such as real estate and medicine. We start by defining the metaverse, its current state, and future potential. The book delves into how blockchain and related technologies like crypto and web3 are integral to the metaverse. We discuss various perspectives on the future of these technologies beyond just virtual reality. The book revisits the metaverse's usage in subsequent chapters, illustrating its applications through case studies like *State of Fashion*, which uses metaverse technology. We also address the broader implications of these innovations and their potential to transform industries and daily life. *Blockchain and the Metaverse Shaping the Future* provides a detailed understanding of the intersection between blockchain and the metaverse, offering valuable insights for anyone interested in these groundbreaking technologies. [A Fortified Far Right?](#) Katalin

Petho-Kiss, Rohan Gunaratna, 2024-04-30 Petho Kiss and Gunaratna understand the nature of the threat posed by the far right because of their findings and they propose effective provisions and mechanisms for detecting and countering it. The book undertakes a consistent procession and empirical examination of available information to arrive at the recognition that in order to dissolve the complexity of the associated threat, we need to scrutinize the functioning of far right threat groups. In depth and consistent analysis on their mode of operation and mindset enables us to identify ways to detect and counter their malicious efforts and activities. The theoretical framework for the analysis lies upon the concept of wave theory. The main question that this book examines is whether far right terrorism constitutes a new wave of global terrorism. One question emerges from this statement that requires further elaboration: Is far right terrorism a novel wave of terrorism? If yes, how is it novel, and what are the novelties or developments in it? This book is for scholars as well as practitioners in the counter terrorism CT and the prevention/countering violent extremism PCVE field. Through specific case studies, students studying CT and/or PCVE could gain insight into the operational functionalities of far right threat groups. This may help them to get a more accurate understanding of the threat posed by these entities. Examining the recruitment, funding, communication practices, and modus operandi of worrisome threat actors equips us to design the most effective countermeasures and identify the hiatuses in applicable legislative regimes.

The Sociology of Violent Extremism Suraj Lakhani, Amarnath Amarasingam, 2025 *The Sociology of Violent Extremism* is an essential collection addressing key challenges in studying violent extremism. Since 9/11, terrorism literature has expanded, aiming to understand, prevent, and predict evolving threats. However, early research often lacked academic rigor and empirical depth. As the field has developed, more thorough studies have appeared, but the focus is often reactive, centred on recent attacks and ideological waves, and tends to remain isolated from other disciplines. The urgent need for policy relevance has limited deep theoretical exploration. Despite these challenges,

valuable contributions have come from criminology psychology sociology social psychology and communications theory Yet sociological theory is still underused in terrorism studies The Sociology of Violent Extremism highlights the importance of a sociological approach to understanding violent extremism It promotes using established theoretical frameworks to gain deeper insights into the social dynamics of these phenomena This book features interdisciplinary case studies and theoretical developments showing the value of sociological perspectives in addressing current issues in violent extremism The book aims to provide researchers with a theoretical toolbox that can be deployed in their own work encouraging the use of sociological theories to improve the understanding of violent extremism and develop effective countermeasures It emphasizes viewing violent extremism as a result of complex social processes embedded in societal structures Provided by publisher **CONAT 2024 International Congress of Automotive and Transport Engineering** Anghel Chiru,Dinu Covaciu,2024-11-19 These 3 volume proceedings includes selected and reviewed papers from CONAT 2024 the 13th edition of the International Congress of Automotive and Transport Engineering held in Brasov Romania in November 2024 Authors are experts from research industry and universities coming from around the world The papers are covering the latest developments in automotive vehicles and environment advanced transport systems and road traffic advanced powertrain systems new materials manufacturing technologies and logistics accident research and analysis and innovative solutions for automotive vehicles The congress is organized by SIAR Society of Automotive Engineers from Romania in cooperation with SAE International and Transilvania University of Brasov This third volume presents the papers on Advanced Transport Systems Accident Research and Analysis and some related to History of Automotive Technics and Technology **Fashion Communication in the Digital Age** Nadzeya Sabatini,Teresa Sádaba,Alessandro Tosi,Veronica Neri,Lorenzo Cantoni,2023-08-08 This is an open access book FACTUM Conference proceedings are the output of one of the few academic events of its nature happening globally researching fashion communication from different angles and perspectives It includes contributions from scholars studying communication and marketing management digital transformation and cultural heritage among other disciplines This book presents papers from the third bi annual Conference which aims to become the major reference point in the field These proceedings seek to promote theoretical and empirical interdisciplinary work on how various communication practices impact both the fashion industry and societal fashion related practices and values With these proceedings several objectives are aimed to be achieved namely to establish and consolidate an international and interdisciplinary network of scholars in the field of fashion communication to share methodological approaches to expand the dialogue between communications studies and fashion related disciplines to encourage junior researchers to pursue their scientific interests in this field Finally the book can be used by professionals in the field of fashion communication and marketing who are eager to access sound research in a field that is developing very fast due to its digital transformation Global Fintech Revolution Lerong Lu,2024-09-23 Lerong Lu examines the biggest change in modern financial industry
