School of Communication, OhioLINK Electronic Theses and Dissertations Center, 2013 Abstract The purpose of this study is to evaluate the current critical climate in popular online video game reviews i.e. video game criticism written for a general audience So far most of the research published in this area focuses on how the reviews reflect the games themselves rather than strictly examining the content of the reviews in this growing body of literature This study uses computer-aided text analysis CATA supplemented with human coding to identify typological differences between film and video game reviews as well as differences in theory usage and critical thought and style Video game reviews are more concerned with the price of the work being reviewed supporting the notion for a utility theory of video games Game reviewers also tend to find redeeming qualities even in very flawed games suggesting they are either overly passionate and/or concerned about keeping advertisers happy Although not at the exceedingly high levels as previous studies the author finds support for using usability heuristics e.g. responsiveness of controls use of in-game tutorials to review games Neither body of popular criticism examined delves deeply into theoretical frameworks for auteur or feminist theories but discussion is provided as to how the reviewers could address these issues should they choose to do so **The Ultimate Guide** Anthony Wright, Lecturer in Political Studies Department of Extramural Studies Anthony Wright, 2017-08-08 Truly the Ultimate ROBLOX Guide This guide starts with the basics and will teach you everything you need to know including how to make an account and how to customize your avatar The guide quickly moves into more advanced topics such as how to earn Robux reduce lag make your own games and even make create paintings So what is ROBLOX ROBLOX is an online virtual playground and workshop where kids of all ages can safely interact create have fun and learn It's unique in that practically everything on ROBLOX is designed and constructed by members of the community ROBLOX is designed for 8 to 18 year olds but it is open to people of all ages Each player starts by choosing an avatar and giving it an identity They can then explore
