Copyright Law and Streaming Séverine Dusollier, 2025-05-06 On the internet music films and TV shows are now just a few clicks away readily available for listening or viewing While piracy websites and file sharing software initially disrupted the entertainment economy the streaming technology has since been embraced by new operators from Spotify to Netflix providing an unprecedented abundance of cultural content Copyright laws around the world have addressed the many issues brought about by streaming services whether lawful or not ranging from copyright enforcement artists remuneration to liability of video sharing platforms and cultural diversity This book presents an extensive comparative analysis of legislative and judiciary efforts to adapt to this technological and cultural revolution

Collective Management of Music Copyright Qinqing Xu, 2023-04-17 Two of the objectives of the Chinese Copyright Law are to protect the copyright of authors to their literary and artistic works and encourage the creation and dissemination of works In practice however in spite of the existence of the Music Copyright Society of China MCSC that was established to assist with exercising copyright music creators in China remain in need of help to protect and manage their fragmented copyright The MCSC was the first collective management organisation CMO in mainland China and is the only CMO in the field of musical works While there is a large music industry and copyright business in China the MCSC only had 11 356 members at the end of 2021 The third amendment of the Chinese Copyright Law was initiated in 2011 and came into effect in June 2021 after a long debate for almost ten years The discussion of the third amendment has highlighted the controversial topic of collective management of copyright This book explores the adequacy of the MCSC as an intermediary representing rights for music creators The main argument developed in this study is that the work of the MCSC for individual composers and lyricists is hampered by shortcomings in the regulatory regime as well as by a lack of members rights to participate in the management of their own rights and by the ineffective international cooperation between the MCSC and other musical CMOs overseas The analysis is undertaken through a case study approach comparing the collective management systems of music copyright in China the United States and Australia and addressing the question of how musical CMOs operate in these countries Specifically three perspectives are examined the regulatory systems designed to limit the misuse of those CMOs monopoly members rights in the organisations and international cooperation between these CMOs Overall the main findings of this book suggest that the MCSC in China could work more effectively to protect music creators interests In contrast although the operational frameworks of the American Society of Composers Authors and Publishers ASCAP and the Broadcasting Broadcast Music Inc BMI in the United States and the Australasian Performing Right Association APRA in Australia are not perfect models the systems in these two countries may at least provide reference points for potential improvement of the regime of the MCSC The research recommends three courses of action strengthening the regulatory design overseeing the MCSC s monopoly clarifying the relationship between the MCSC and its members while providing the members with the right to manage their

own copyright and improving the international cooperation between the MCSC and CMOs in other countries

Competition Law, Regulation and Digital Platforms Ruth Taplin, Kazuhiko Fuchikawa, 2025-05-06 This book confronts and analyses how competition law in its present form is unable to deal with the new advances in digital technology that have made tech giants not subject to national jurisdictions as they straddle the world with a particular focus on Japan China UK EU and USA Demonstrating how the gatekeeping role of digital platforms has broken through the boundaries of national regulation this book highlights examples where companies have broken and infringed antitrust law with impunity pursuing self preferencing and unfair competition practices solely for their own profitability It also identifies how tech giants can open their digital platforms for fair use by consumers small and medium enterprises SMEs and creators while still allowing tech giants to maintain their important role as gatekeepers of digital security that protects users from cyberattacks This is followed by an examination of the similarities between tech giants and big pharma within the competition law and intellectual property context revealing how tech giants are beginning to target the healthcare sector Exploring how intellectual property rights are interwoven through new modernising regulations to curtail the dominance of Big Tech on digital platforms this book will appeal to students scholars and practitioners of Business Ethics Intellectual Property Law and Regulation

EU Securities and Financial Markets Regulation Niamh Moloney, 2023-03-25 Over the decade or so since the global financial crisis rocked EU financial markets and led to wide ranging reforms EU securities and financial markets regulation has continued to evolve The legislative framework has been refined and administrative rulemaking has expanded Alongside the Capital Markets Union agenda has developed the UK has left the EU and ESMA has emerged as a decisive influence on EU financial markets governance All these developments as well as the Covid 19 pandemic have shaped the regulatory landscape and how supervision is organized EU Securities and Financial Markets Regulation provides a comprehensive critical and contextual account of the intricate rulebook that governs EU financial markets and its supporting institutional arrangements It is framed

by an assessment of how the regime has evolved over the decade or so since the global financial crisis and considers among other matters the post crisis reforms to key legislative measures the massive expansion of administrative rulemaking and of soft law the Capital Markets Union agenda the development of supervisory convergence as the means for organizing pan EU supervision and ESMA's role in EU financial markets governance Its coverage extends from capital raising and the Prospectus Regulation to financial market intermediation and the MiFID II MiFIR and IFD IFR regimes to the new regulatory regimes adopted since the global financial crisis including for benchmarks and their administrators to retail market regulation and the PRIIPs Regulation and on to the EU's third country regime and the implications of the UK's departure from the EU This is the fourth edition of the highly successful and authoritative monograph first published as EC Securities Regulation Heavily revised from the third edition to reflect developments since the global financial crisis it adopts the in depth contextual and analytical approach of earlier editions and so considers the market political institutional and international context of the regulatory and supervisory regime

Relating to Things Heather Wiltse, 2020-05-14 We relate to things and things relate to us Emerging technologies do this in ways that are interesting and exciting but often also inaccessible or invisible In this open access book leading design researchers and philosophers respond to issues raised by this situation inquiring into what it means to live with and relate to things that can actively relate to us and that relate to each other in ways that do not involve us at all Case studies include Amazon's Alexa the Internet of Things Pok mon Go and Roomba the robot vacuum cleaner Authors explore everything from the care work undertaken by objects reciprocal human machine learning technological mediation as a form of control and what it takes to reveal things that tend to be hidden and that often by design conceal the ways in which they use us As a whole *Relating to Things* is a collaborative philosophical inquiry into the nature and consequences of contemporary technological things It is a design inquiry into the current nature of the artificial and possibilities for how things might be otherwise The eBook editions of this book are available open access under a CC BY NC ND 4.0 licence on bloomsburycollections.com

The Oxford Handbook of Publishing Angus Phillips, Michael Bhaskar, 2019-04-11 Publishing is one of the oldest and most influential businesses in the world It remains an essential creative and knowledge industry worth over 140 billion a year which continues to shape our education and culture Two trends make this a particularly exciting time The first is the revolution in communications technology that has transformed what it means to publish far from resting on their laurels and retreating into tradition publishers are doing as they always have staying on the cutting edge The second is the growing body of academic work that studies publishing in its many forms Both mean that there has never been a more important time to examine this essential practice and the current state of knowledge The Oxford Handbook of Publishing marks the coming of age of the scholarship in publishing studies with a comprehensive exploration of current research featuring contributions from both industry professionals and internationally renowned scholars on subjects such as copyright corporate social responsibility globalizing markets and changing technology

This authoritative volume looks at the relationship of the book publishing industry with other media and how intellectual property underpins what publishers do. It outlines the complex and risky economics of the industry and examines how marketing, publicity and sales have become ever more central aspects of business practice while also exploring different sectors in depth and giving full treatment to the transformational and much discussed impact of digital publishing. This Handbook is essential reading for anyone interested in publishing literature and the business of media, entertainment, culture, communication and information.

Computers and Society Ronald M. Baecker, 2019-04-24. The last century has seen enormous leaps in the development of digital technologies and most aspects of modern life have changed significantly with their widespread availability and use. Technology at various scales: supercomputers, corporate networks, desktop and laptop computers, the internet, tablets, mobile phones and processors that are hidden in everyday devices and are so small you can barely see them with the naked eye, all pervade our world in a major way.

Computers and Society: Modern Perspectives is a wide ranging and comprehensive textbook that critically assesses the global technical achievements in digital technologies and how they are applied in media, education and learning, medicine and health, free speech, democracy and government, and war and peace. Ronald M. Baecker reviews critical ethical issues raised by computers such as digital inclusion, security, safety, privacy, automation and work, and discusses social, political and ethical controversies and choices now faced by society. Particular attention is paid to new and exciting developments in artificial intelligence and machine learning and the issues that have arisen from our complex relationship with AI.
