## **Environmental Policy Science's Exploration for**

**Innovative Data** Nicholas Guehlstorff,2025-08-04 This edited volume discusses the use of nontraditional data sources in environmental political research and its implications for policymaking Researchers involved in natural resource investigations and pollution control analysis must be entrepreneurial in finding and utilizing data sets to answer pressing policy questions To remain relevant successful researchers must increasingly seek data beyond routine federal program assessments fragmented local surveys and limited stakeholder interactions This volume surveys current environmental

research that draws on emerging data sources such as social media and political discourse. It poses critical questions about the potential of creative and innovative analytical approaches particularly in contexts where policymakers have disregarded objective evidence based social science on environmental challenges. By encouraging scholars to adopt new methods research designs and data sources this book offers valuable insights for researchers across the social and environmental sciences.

**Cyber Persistence Theory** Michael P. Fischerkeller, Emily O. Goldman, Richard J. Harknett, 2022 A bold reconceptualization of the fundamentals driving behavior and dynamics in cyberspace. Most cyber operations and campaigns fall short of activities that states would regard as armed conflict. In Cyber Persistence Theory Michael P. Fischerkeller, Emily O. Goldman, and Richard J. Harknett argue that a failure to understand this strategic competitive space has led many states to misapply the logic and strategies of coercion and conflict to this environment and thus suffer strategic loss as a result. The authors show how the paradigm of deterrence theory can neither explain nor manage the preponderance of state cyber activity. They present a new theory that illuminates the exploitative rather than coercive dynamics of cyber competition and an analytical framework that can serve as the basis for new strategies of persistence. Drawing on their policy experience they offer a new set of prescriptions to guide policymakers toward a more stable secure cyberspace.

**Children's Technology Review**, 2005 **Disconnected** Milan Frankl, 2025-02-25 *Disconnected: Exploring the Decline of Social Networks* examines the future of social networks highlighting their transformation from community builders to sources of misinformation and frustration. Using interdisciplinary insights it uncovers the complex interplay of technological social and cultural factors behind this shift. It discusses the impact on individuals businesses and society proposing pathways to a healthier digital environment. The book delves into the fascinating journey of social networks tracing their evolution from tools that fostered community building to platforms that can sometimes spread misinformation. It explores how privacy issues are crucial in shaping user experiences and trust. *Disconnected* also examines the phenomenon of algorithmic polarization where algorithms create echo chambers and contribute to the spread of disinformation. The author explores the social and cultural factors that influence social networks. Additionally he includes case studies that highlight the real world impacts of social networks on individuals businesses and society as a whole. Readers will discover practical solutions that offer pathways to creating a healthier digital environment enable recognition of misinformation and privacy issues more effectively as well as gain strategic insights that will help navigate and influence the future of social networks.

**How Incumbent Firms Navigate Nascent Digital Platform Ecosystems in the Internet of Things** Daniel Hodapp, 2021-03-17 This thesis is focusing on three little explored contextual conditions that are important for a better understanding of digital platform ecosystems digital platforms in a nascent stage of maturity digital platforms built by incumbents and digital platforms embedded in the IoT phenomenon. Thus the thesis contributes to the question of how established companies navigating nascent digital platform ecosystems in the IoT. The work builds and contributes to the literature on digital platform

ecosystems Three main contributions are made through explorative qualitative research in the form of Delphi and case studies as well as through systematic literature research on the above mentioned themes First the thesis synthesizes important knowledge about the nascent stage of digital platform ecosystems and identifies value co creation challenges specific to this early maturity stage Second given the increasing importance of established companies in the platform discourse this thesis identifies the intra and inter organizational challenges that incumbent organizations face in building digital platform ecosystems emphasizing the importance of the organizational type in building a platform ecosystem Third the dissertation positions platforms in the IoT as a new digital platform instantiation within the scholarly platform discourse and outlines important phoneme related characteristics that determine value creation [Tiktok User Guide](#) Dennis S
