structure procedures and likely judicial interpretation to determine whether it improves upon the traditional standard forms of contract. Special attention is given in the commentary to the development and the significance of the principles underlying preparation of the NEC as well as the arguments in favour of and against them. Throughout the detailed commentary upon the NEC clauses comparisons to the traditional forms are also made to highlight unique features and principles of general application. The conclusion reached is that the NEC does make a significant contribution to the development of standard forms of contract, addresses many of their shortcomings and offers one of the best models for their future development direction and design. The commentary draws upon the body of the project management literature and legal analysis to support its conclusions. **The New Engineering Contract: A legal commentary** will be essential reading for lawyers, barristers and solicitors as well as engineers and project managers. **Construction Law** Jim Mason, 2023-05-09.
