Newborn Care Guide

Newborn Care Guide:

Maternal and Newborn Care Joanita De Kock, Christa Van der Walt, 2004 The midwife's role is examined in the community and family health context in this handbook on effective maternal and newborn care for midwives and other healthcare providers. The skills, competencies and knowledge required to make informed decisions about neonatal and postnatal care are covered including anatomy and the physiology of reproduction, high risk pregnancies and labor and birth. Theoretical and practical issues illuminate a midwife's role in the prevention of illness in mothers and babies with attention to the unique challenges of midwifery in developing nations. Insights from current research studies and critical questions about midwife practice will help those new to health care understand the unique challenges of this form of health service delivery.

Pregnancy, Childbirth, Postpartum, and Newborn Care, 2003 This guide provides a full range of updated evidence based norms and standards that will enable health care providers to give high quality care during pregnancy, delivery and in the postpartum period considering the needs of the mother and her newborn baby. All recommendations are for skilled attendants working at the primary level of health care either at the facility or in the community. They apply to all women attending antenatal care in delivery, postpartum or post-abortion care or who come for emergency care and to all newborns at birth and during the first week of life or later for routine and emergency care. This guide is a guide for clinical decision making. It facilitates the collection, analysis, classification and use of relevant information by suggesting key questions, essential observations and/or examinations and recommending appropriate research based interventions. It promotes the early detection of complications and the initiation of early and appropriate treatment including time referral if necessary. Correct use of this guide should help reduce high maternal and perinatal mortality and morbidity rates prevalent in many parts of the developing world thereby making pregnancy and childbirth safer. [The Essential Baby Care Guide](#) Rebecca Chicot, Diana Hill, Robert Winston, 2015-09-10 Having a baby is a fantastic event but it can be intense and challenging. From the start there are so many vital things to understand and parents don't always know to whom or where to turn. With a panel of experts including Professor Robert Winston, The Royal College of Paediatrics and St John Ambulance offering up to date advice, this book gives well researched, medically backed up information to help parents make the right decisions for themselves and for their baby. Looking at a range of subjects such as sleeping, feeding and first aid, each chapter is structured around common questions asked by parents. Amongst many others, the areas covered include breastfeeding, how to maintain a bond between mother and baby if you choose to formula feed, moving to solids, health issues such as recognising a meningitis rash, when to go to hospital, immunisations and how they work, how to soothe your baby when crying, a guide to your baby's sleeping patterns, a guide to your baby's social, physical and cognitive development and finally advice on safety and infant first aid. The Essential Baby Care Guide is the third in the series of reference books compiled by The Essential Parent Company and advised by Professor Robert Winston. With tips, lists of do's and don'ts and case studies, this book gives you
