## Claim:

There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Contraband Guides Paul H. D. Kaplan, 2020-07-09 In his best selling travel memoir *The Innocents Abroad* Mark Twain punningly refers to the black man who introduces him to Venetian Renaissance painting as a contraband guide a term coined to describe fugitive slaves who assisted Union armies during the Civil War By means of this and similar case studies Paul H D Kaplan documents the ways in which American cultural encounters with Europe and its venerable artistic traditions influenced nineteenth century concepts of race in the United States Americans of the Civil War era were struck by the presence of people of color in European art and society and American artists and authors both black and white adapted and transformed European visual material to respond to the particular struggles over the identity of African Americans Taking up the work of both well and lesser known artists and writers such as the travel writings of Mark Twain and William Dean Howells the paintings of German American Emanuel Leutze the epistolary exchange between John Ruskin and Charles Eliot Norton newspaper essays written by Frederick Douglass and William J Wilson and the sculpture of freed slave Eug ne Warburg Kaplan lays bare how racial attitudes expressed in mid nineteenth century American art were deeply inflected by European traditions By highlighting the contributions people of black African descent made to the fine arts in the United States during this period along with the ways in which they were represented Contraband Guides provides a fresh perspective on the theme of race in Civil War era American art It will appeal to art historians to specialists in African American studies and American studies and to general readers interested in American art and African American history

**Fundamentals of Criminology** Kelly Frailing, Dee Wood Harper, 2013-07-19 Fundamentals of Criminology New Dimensions delivers a comprehensive and comprehensible introduction to the discipline of criminology As the title implies it covers the fundamentals of criminology including the major theories of crime causation classic and current empirical tests of those theories the strengths and weaknesses and the policy implications of each It also describes the types of crime and provides current rates trends over time and theoretical explanations for each as well as a discussion of characteristics of offenders and victims What sets this book apart from the many other fine criminology textbooks out there is its inclusion of some new dimensions of criminology The new dimensions in this book include but are not limited to research designs in criminology new theories of crime causation crime in different contexts connections between criminology and criminal justice policy and a number of lingering issues for both disciplines In combination with the fundamentals these new dimensions are designed to provide readers with the richest most complete understanding of what crime is how much of it

there is what causes it and what do to about it as well as the ability and desire to pose important questions for the future of both criminology and criminal justice The authors have produced a comprehensive readable and thoroughly interesting text covering the topic of sociological criminology Yes there are a plethora of texts in this area but Harper and Frailing s addition to the field has a number of features moving it ahead of the competition There is in depth coverage of emerging areas in crime including cybercrime and human trafficking as well as an excellent section on how disasters augment the opportunities for crime by hindering capable guardianship The authors arguments for evidence based crime prevention strategies and public policies are compelling Fundamentals of Criminology is worthy of the closest consideration by instructors teaching undergraduate criminology courses Jay Corzine professor of sociology University of Central Florida     *The Engineer* ,1874
