Boomer Nation Steve Gillon, 2010-05-11 The Baby Boomers born between 1946 and 1964 form the single largest demographic spike in American history Never before or since have birth rates shot up and remained so high so long with some obvious results when the Boomers were kids American culture revolved around families and schools when they were teenagers the United States was wracked by rebelliousness now as mature adults the Boomers have led America to become the richest and most powerful country in the history of the world Boomer Nation will for the first time offer an incisive look into this generation that has redefined America s culture in so many ways from women s rights and civil rights to religion and politics Steve Gillon combines firsthand reporting of the lives of six Boomers and their families with a broad look at postwar American history in a fascinating mix of biography and history His characters like America itself reflect a variety of heritages rich and poor black and white immigrant and native born Their lives take very different paths yet are shaped by key events and trends in similar ways They put a human face on the Boomer generation showing what it means to grow up amid widespread prosperity with an explosion of democratic autonomy that led to great upheavals but also a renewal from below of our churches industries and even the armed forces The same generation dismissed as pampered and selfish has led a revival of religion in America the same generation that unleashed the women s movement has also shifted our politics into its most market oriented anti governmental era since Woodrow Wilson Gillon draws many lessons from this generational history above all that the Boomers have transformed America from the security and authority seeking culture of their parents to the autonomy and freedom rich world of today When the greatest generation was young and not yet at war it was widely derided as selfish and spoiled Only in hindsight long after the sacrifices of World War II did it gain its sterling reputation Today as Boomer America rises to the challenges of the war on terror we may be on the cusp of a reevaluation of the generation of Presidents Bush and Clinton That generation has helped make America the richest strongest nation on the planet and as Gillon s book proves it has had more influence on the rest of us than any other group Boomer Nation is an eye opening reinterpretation of the past six decades

Damascius' Philosophy of Time Pantelis Golitsis, 2023-06-19 The late Platonist philosopher Damascius both reassumed and rejuvenated the rich and long established Greek thinking about time In distinguishing between different perceptions of time by Plato Aristotle and his Neoplatonist predecessors Damascius offered novel perspectives which can be seen as anticipating modern and contemporary theories of time such as McTaggart s series and presentism The greatest merit of his philosophy of time however is his deep reflection on what it is for a living being to have its being in becoming as it happens with us human

beings and how this relates to stillness temporality and temporalization Time is interpreted by Damascius not merely as a concomitant of the celestial motions nor as an abstract entity existing in the human soul but as a power of ordering which is active at different levels Damascius time comprises the biological and the historical time but is also the time that pertains to the essence and the activity of heaven in which there is neither past nor future The present book explores the richness of Damascius thought by going into the fundamental concepts of his philosophy of time the indivisible now and the present time the flowing now and the non flowing now the flowing time and the whole of time in which past present and future coincide Damascius fully developed his thoughts about time in his treatise On Time which is lost The preserved fragments of this treatise are translated and annotated in an Appendix
