Online Future Professions Technology Transform Experts:

The Future of the Professions Richard Susskind,Daniel Susskind,2015-10-22 This book predicts the decline of today's professions and describes the people and systems that will replace them. In an Internet society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century. The Future of the Professions explains how increasingly capable systems from telepresence to artificial intelligence will bring fundamental change in the way that the practical expertise of specialists is made available in society. The authors challenge the grand bargain the arrangement that grants various monopolies to today's professionals. They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of the best is enjoyed only by a few. In their place they propose six new models for producing and distributing expertise in society. The book raises important practical and moral questions. In an era when machines can outperform human beings at most tasks what are the prospects for employment who should own and control online expertise and what tasks should be reserved exclusively for people. Based on the authors in depth research of more than ten professions and illustrated by numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century

Handbook of Research on Knowledge and Organization Systems in Library and Information Science Holland, Barbara Jane,2021-06-25 Due to changes in the learning and research environment changes in the behavior of library users and unique global disruptions such as the COVID 19 pandemic libraries have had to adapt and evolve to remain up to date and responsive to their users. Thus libraries are adding new digital resources and services while maintaining most of the old traditional resources and services. New areas of research and inquiry in the field of library and information science explore the applications of machine learning artificial intelligence and other technologies to better serve and expand the library community. The Handbook of Research on Knowledge and Organization Systems in Library and Information Science examines new technologies and systems and their application and adoption within libraries. This handbook provides a global perspective on current and future trends concerning library and information science. Covering topics such as machine learning library management ICTs blockchain technology social media and augmented reality this book is essential for librarians library directors library technicians media specialists data specialists catalogers information resource officers administrators IT consultants and specialists academicians and students

The Blueprint for AI Adoption and Societal Transformation Sandeep Bhalekar,Amit Tiwary,2025-12-17 This book analyses artificial intelligence AI and its impact on sustainability ethics security and society. It provides actionable strategies for eco friendly AI navigating legal frameworks and implementing ethical practices. It examines security challenges from AI misuse outlining necessary cybersecurity enhancements. Real world case studies bridge theory and practice. Guidance is provided for aligning AI adoption with societal and environmental goals promoting responsible AI development for a sustainable future. This

comprehensive study of AI begins by looking at AI's role in environmental sustainability providing actionable strategies for eco friendly AI development and deployment. This includes understanding the complex relationship between AI and the environment to minimise its footprint and promote AI solutions that contribute to environmental goals. The authors extend into an insightful discussion on navigating the intricate legal frameworks and implementing ethical AI practices. This guidance reduces the risk of legal challenges and reputational damage leading to increased trust and responsible AI development and use. Bridging the gap between theory and practice is another important feature in this book. With real world case studies the reader gains a practical understanding of how AI is being used in different contexts. This enhances the accelerated adoption and increased innovation of AI solutions in different fields. This book provides a clear roadmap for responsible and sustainable AI integration aligning AI initiatives with broader societal and environmental objectives. The primary audience for this book includes business leaders, professionals, policymakers, technologists and AI practitioners.

Making Sense of Expertise Reiner Grundmann, 2022-10-24 Current debates about experts are often polarized and based on mistaken assumptions with expertise either defended or denigrated. *Making Sense of Expertise* instead proposes a conceptual framework for the study of expertise in order to facilitate a more nuanced understanding of the role of expertise in contemporary society. Too often different meanings of experts and expertise are implied without making them explicit. Grundmann's approach to expertise is based on a synthesis of approaches that exist in various fields of knowledge. The book aims at dispelling much of the confusion by offering a comprehensive and rigorous framework for the study of expertise. A series of in depth case studies drawn from contemporary issues including the climate crisis and the COVID 19 pandemic provide the empirical basis of the author's comprehensive approach. This thought provoking book will be of great interests to students, instructors and researchers in a range of fields in the humanities, social sciences and science and technology studies.

Proceedings, 1983 **Health Informatics - E-Book** Lynda R. Hardy, 2022-12-02 *American Journal of Nursing AJN Book of the Year Awards* 1st Place in Informatics 2023 Selected for Doody's Core Titles 2024 in Informatics Learn how information

technology intersects with today's health care. *Health Informatics An Interprofessional Approach* 3rd Edition follows the tradition of expert informatics educators Ramona Nelson and Nancy Staggers with new lead author Lynda R Hardy to prepare you for success in today's technology filled healthcare practice. Concise coverage includes information systems and applications such as electronic health records, clinical decision support, telehealth, mHealth, ePatients, and social media tools as well as system implementation. New to this edition are topics that include analytical approaches to health informatics, increased information on FHIR and SMART on FHIR, and the use of health informatics in pandemics. Chapters written by experts in the field provide the most current and accurate information on continually evolving subjects like evidence based practice, EHRs, PHRs, mobile health, disaster recovery, and simulation. Objectives, key terms, and an abstract at the beginning of each chapter provide an overview of what each chapter will cover. Case studies and discussion questions at the end of each chapter encourage higher level thinking that can be applied to real world experiences. Conclusion and Future Directions discussion at the end of each chapter reinforces topics and expands on how the topic will continue to evolve. Open ended discussion questions at the end of each chapter enhance students' understanding of the subject. The mHealth chapter discusses all relevant aspects of mobile health including global growth, new opportunities in underserved areas, governmental regulations on issues such as data leaking and mining, implications of patient generated data, legal aspects of provider monitoring of patient generated data, and increased responsibility by patients. Important content including FDA and state based regulations, project management, big data, and governance models prepares students for one of nursing's key specialty areas. UPDATED Chapters reflect the current and evolving practice of health informatics using real life healthcare examples to show how informatics applies to a wide range of topics and issues. NEW Strategies to promote healthcare equality by freeing algorithms and decision making from implicit and explicit bias are integrated where applicable. NEW The latest AACN domains are incorporated throughout to support BSN, Master's, and DNP programs. NEW Greater emphasis on the digital patient and the partnerships involved including decision making.
