*Business Basics for Veterinarians* Lowell J. Ackerman, 2002 While many veterinarians choose to believe that expertise in medicine necessarily precludes having business sense nothing could be further from the truth In fact business and medicine are both evidence based disciplines with much in common When a patient is sick we use standard algorithms to determine the most likely causes and run appropriate diagnostic tests We do the same thing with a business that is in failing health We might run an inventory audit instead of a radiograph or look at financial statements rather than laboratory results but the problem solving approach is the same Once a medical problem is unearthed we prescribe appropriate treatment The same holds for businesses A practice may not need an antibiotic injection but an infusion of capital might be just what the doctor orders for an outdated facility Finally once the problem is corrected we periodically monitor the patient with wellness exams assuring continued health Businesses are no different We continue to take their vital signs benchmark them against established normals and make sure that they continue
