**Feeding the Mind: The Connection Between Diet, Drugs, and Mental Health Volume 2** Wael Mohamed, Aynur Özge, 2025-10-24 This authoritative and science-backed volume explores the profound ways in which nutrition shapes our thoughts, emotions, and healing processes throughout life from childhood to late adulthood. Offering a culturally inclusive and integrative approach, the book bridges functional foods, personalized nutrition, and mental wellness, providing groundbreaking insights into complex issues such as substance use disorders and chronic pain. Rich with the latest scientific findings, it examines the gut-brain connection, the role of antioxidants, omega-3 fatty acids, micronutrients, probiotics, and the impact of food additives on cognitive and emotional health. Whether you're a healthcare professional, researcher, or health-conscious reader, this comprehensive resource equips you with practical strategies and future-focused perspectives to transform mental health through dietary wisdom.

Artificial Intelligence in Radiation Oncology and Biomedical Physics Gilmer Valdes, Lei Xing, 2023-08-14 This pioneering book explores how machine learning and other AI techniques impact millions of cancer patients who benefit from ionizing radiation. It features contributions from global researchers and clinicians focusing on the clinical applications of machine learning for medical physics. AI and machine learning have attracted much recent attention and are being increasingly adopted in medicine, with many clinical components and commercial software including aspects of machine learning integration. General principles and important techniques in machine learning are introduced, followed by discussion of clinical applications, particularly in radiomics, outcome prediction, registration, and segmentation, treatment planning, quality assurance, image processing, and clinical decision making. Finally, a futuristic look at the role of AI in radiation oncology is provided. This book brings medical physicists and radiation oncologists up to date with the most novel applications of machine learning to medical physics. Practitioners will appreciate the insightful discussions and detailed descriptions in each chapter. Its emphasis on clinical applications reaches a wide audience within the medical physics profession.

**Oxford Textbook of Shared Decision Making in Healthcare**, 2025-08-21 Healthcare systems around the world are placing increasing importance on the relationship between patient choice and clinical decision making, with many countries having shared decision making as a central theme in their healthcare policy developments. The concept of shared decision making (SDM) in healthcare is simple: clinicians and patients work together when solving problems and making decisions. However, the context and implementation are more challenging. Written by a global team of experts, the Oxford Textbook of Shared Decision Making, fourth edition, examines from both theoretical and practical perspectives what comprises an effective decision-making process, looking at the benefits and potential difficulties that arise when patients and clinicians share healthcare decisions. The first sections

cover the theory methods and implementation of SDM Later sections examine SDM from the viewpoints of different clinical and surgical specialties and allied disciplines such as nursing pharmacy and midwifery Each chapter contains reflections from a patient partner with lived experience of SDM giving a truly diverse and collaborative account of how SDM can work between patients families carers and healthcare professionals Authoritative evidence based and grounded in clinical practice the Oxford Textbook of Shared Decision Making explores a very important paradigm shift in the delivery of healthcare providing thoughtful consideration and key strategies for its successful implementation
