**Electric Vehicle Integration into Modern Power Networks** Rodrigo Garcia-Valle, João A. Peças Lopes, 2012-11-29

Electric Vehicle Integration into Modern Power Networks provides coverage of the challenges and opportunities posed by the progressive integration of electric drive vehicles. Starting with a thorough overview of the current electric vehicle and battery state of the art this work describes dynamic software tools to assess the impacts resulting from the electric vehicles deployment on the steady state and dynamic operation of electricity grids identifies strategies to mitigate them and the possibility to support simultaneously large scale integration of renewable energy sources. New business models and control management architectures as well as the communication infrastructure required to integrate electric vehicles as active demand are presented. Finally regulatory issues of integrating electric vehicles into modern power systems are addressed. Inspired by two courses held under the EES UETP umbrella in 2010 and 2011 this contributed volume consists of nine chapters written by leading researchers and professionals from the industry as well as academia.

**Electric Vehicle Recharge Time, Reliability, and Interoperability** Brian J. Kozumplik, 2022-12-15 As more consumers and operators adopt electric vehicles EVs as personal and fleet vehicles questions regarding recharge time reliability and interoperability of EV supply equipment and charging systems currently in use across North America and Europe remain. The current lack of understanding has led to consumer anxiety and in some cases inadvertent abuse and mishandling of electric supply equipment. Electric Vehicle Recharge Time Reliability and Interoperability navigates issues such as charging equipment reliability the complexity of interoperability concerning charging networks EVs and payment systems various public and private charging network issues and lagging regulations and standards. While many challenges need to be addressed this report also identifies the improvements made since early adoption of EV charging technology as well as ongoing efforts to improve it further. **Machine Vision and Navigation** Oleg Sergiyenko, Wendy Flores-Fuentes, Paolo Mercorelli, 2019-09-30 This book presents a variety of perspectives on vision based applications. These contributions are focused on optoelectronic sensors 3D. Discusses applications such as daily use devices including robotics detection tracking and stereoscopic vision systems pose estimation avoidance of objects control and data exchange for navigation and aerial imagery processing. Includes research contributions in scientific industrial and civil applications.

**Developments and Advances in Intelligent Systems and Applications** Álvaro Rocha, Luís Paulo Reis, 2017-06-10 This book primarily addresses Intelligent Information Systems IIS and the integration of artificial intelligence intelligent systems and technologies database technologies and information systems methodologies to create the next generation of information systems. It includes original and state of the art research on theoretical and practical advances in IIS system architectures tools and techniques as well as success stories in intelligent information systems. Intended as an interdisciplinary forum in which scientists and professionals could share their research.
