**Transport and Logistics Planning and Optimization** Boukachour, Jaouad, Benaini, Abdelhamid, 2023-07-10 Logistics and transportation are a complex set of entities and systems interconnected by many physical financial and information flows and as with all systems there are optimization and planning issues. In addition, they are subject to economic, social and especially environmental pressures with the need to reduce energy consumption and greenhouse gas emissions. There is a need for original research to address these issues. Transport and Logistics Planning and Optimization addresses selected transportation and logistics problems at the strategic, tactical, and operational levels in a multidisciplinary approach not only from a technological perspective but also from a social science perspective. Covering key topics such as supply chain, urban transportation, artificial intelligence, and computer science, this premier reference source is ideal for policymakers, industry professionals, researchers, academicians, scholars, instructors, and students.

**Flexible Resources for Smart Cities** Miadreza Shafie-khah, M Hadi Amini, 2021-11-10 This book paves the road for researchers from various areas of engineering working in the realm of smart cities to discuss the intersections in these areas when it comes to infrastructure and its flexibility. The authors lay out models, algorithms, and frameworks related to the smartness in the future smart cities. In particular, manufacturing firms, electric generation, transmission, and distribution utilities, hardware and software, computer companies, automation, and control manufacturing firms, and other industries will be able to use this book to enhance their energy operations, improve their comfort and privacy, as well as to increase the benefit from the electrical system. The book pertains to researchers, professionals, and R&D in an array of industries.

**Automated and Electric Vehicle: Design, Informatics and Sustainability** Yue Cao, Yuanjian Zhang, Chenghong Gu, 2022-10-28 This book focuses on the design, informatics, and energy sustainability of automated and electric vehicles. Both principles and engineering practice have been addressed from design perspectives toward informatics enabled transport service operation including automated valet parking and charging use cases. This is achieved by providing an in-depth study on a number of major topics such as battery management, eco driving system, telecommunications, transport and charging services, cyber security, etc. The book benefits researchers, engineers, and graduate students in the fields of the intelligent transport system, telecommunication, cyber security, and smart grids.

**Advances in VLSI, Signal Processing and Wireless Communication** Aniruddha Kanhe, Suresh Balanethiram, Pao-Ann Hsiung, Dushantha Nalin K. Jayakody, 2025-08-26 This book presents select proceedings of the International Conference on Communication Systems ICOCS 2023. The book includes cutting edge research papers in the emerging fields of communication, signal processing, and VLSI. The book is a unique collection of chapters from different areas with a common theme. It benefits academic researchers and practitioners in the industry who work in this field.

**Renewable Energy for Plug-In Electric Vehicles** Thanikanti Sudhakar Babu, Praveen Kumar Balachandran, Nnamdi Nwulu, 2024-07-04 Renewable Energy for Plug-In Electric Vehicles: Challenges, Approaches, and Solutions for Grid Integration

provides a holistic guide to the critical technical challenges of integrating renewable energy for grid connected electric vehicles Considering the impact of renewable energy integration from a wide range of perspectives this book leverages its global range and expertise to cover problems from power stability to market strategies fast charging and cybersecurity Practical solutions are provided incorporating the latest advances in technologies across meters sensors batteries storage demand response artificial intelligence and power system design Supporting broad understanding and practical solution development the book enables researchers students and industry professionals to take the next steps towards renewably sourced grid integrated electric vehicles Focuses on the essential step of integrating grid charging electric vehicles with renewable energy sources Provides comprehensive analysis of the challenge renewable integration presents for existing electric vehicle technologies Breaks down real world practical case studies and solutions using the latest advances by a global team of experts
