Online Why Stand Up Matters Comedians Manipulate:

Why Stand-up Matters Sophie Quirk, Funny lively and unpredictable stand up comedy is above all a medium to be enjoyed Popular as a good night out and packing the TV schedules stand up permeates British society and culture But ubiquitous though it is we are generally reluctant to consider stand up s social consequences When comedians offend we seem ready to consider the potential for stand up to do some wider harm yet we rarely consider the good that stand up might do This book looks at the social and political impact of stand up comedy in both its positive and negative forms It demonstrates how comedy audiences allow themselves to be manipulated and the potential harm and material benefits that may arise from just being funny

Inequality in Contemporary Stand-Up Comedy in the UK Claire Sedgwick,2024-04-25 This Pivot explores the cultural economy of comedy in the UK looking specifically at the links between industry practices and structures and who produces comedy in the UK The research is based on interviews with comedians in the East Midlands significantly this demographic has been historically under researched in studies of precarity where the East Midlands is typically overlooked in discussions of arts funding and access in favour of a more simplistic north south divide narrative Similarly whilst there has been increased discussion of the precarity of the creative and cultural industries as well as media articles on the difficulty of breaking into comedy as a member of a marginalised group there has been relatively little academic research to support this While Friedman s work in particular has been helpful for understanding the link between comedy producers class and taste making there has been less attention paid to the sociologies of work within comedy This book fillsthesegaps in research by exploring the experiences of comedians in the East Midlands contributing to the rich body of scholarship on inequality in the cultural industries and promoting a better understanding of the impact of structural inequalities and precarity on access to the cultural industries
