**Elon Musk - Ideas & Visions** Hermann Selchow,101-01-01 Elon Musk Ideas Visions How one man is transforming our civilization Join me in the fascinating world of a man who is shaping our present like no other and redefining the future for our civilization Elon Musk the visionary entrepreneur behind Tesla SpaceX Neuralink and Starlink stands for groundbreaking innovations and bold ideas like no other This book not only highlights the milestones of his work and his companies but also the deeper philosophy and premises that drive him a sustainable technologically advanced and multi planetary civilization Find out How Elon Musk paved the way for electromobility and renewable energies Why he is convinced that humanity must colonize Mars What strategies led him to success despite seemingly insurmountable obstacles What lessons you can learn from his leadership style and way of thinking This book is not a biography in the traditional sense it is a source of inspiration for innovators entrepreneurs and anyone who wants to push the boundaries of what is possible Let yourself be carried away by Musk s tireless pioneering spirit and his vision of a better world Hermann Selchow

[Building the Tesla Turbine](#) Vincent

R. Gingery,2014-07-28 Travel back in time and experience the excitement of another era by building your very own model Tesla Turbine The year 1911 Read along as Nikola Tesla describes in his own words the principles and incredible capabilities of his turbine Examine the original Turbine patent descriptions and drawings for yourself and gain an even greater perspective of this amazing invention Also included in this plan booklet are step by step instructions in the form of detailed photos and drawings showing how to construct your very own Tesla turbine Not an exact replica of the original but one that has been simplified thus making it much easier to build than the original The result is an impressive model measuring 3 1 2 wide x 6 long x 4 high Although it comes in a small package this turbine generates impressive power The model as detailed rotates at speeds in excess of 5000 r p m at 80 p s i of air pressure And it has the capability of running either clockwise or counterclockwise at these speeds Because the turbine is capable of such high rotational speeds it has been constructed entirely of stainless steel which is a stronger material than mild steel Building the turbine requires basic metal working ability including the cutting grinding and shaping of metal You will need a small lathe capable of turning at least a 3 1 4 diameter a drill press and or milling machine a hacksaw or bandsaw and an assortment of hand tools including metal cutting snips screwdrivers wrenches etc This is an amazing project and one you are sure to enjoy But be careful Once you start you won t be able to get enough of Tesla and his amazing inventions The more you learn the more you will realize that Nikola Tesla was truly a genius light years ahead of his time
