*The Amazon* Carel Vosmaer,1884 [\*\*Marketing on the Internet and the implications of new technologies\*\*](#) Bernd Anderer,1999-01-25 Inhaltsangabe Abstract Electronic Commerce once thought of as futuristic buzzwords is becoming a commonly used term International newspapers magazines and the electronic media mention at least some forecast or news related to this subject on a daily basis Nevertheless a look at the growing numbers of consulting companies that offer a variety of services relating to Electronic Commerce reveals the immense uncertainty companies are experiencing about what exactly Electronic Commerce is and how they can implement it While it seems that the importance of this issue in the business environment is widely accepted in the US a recent study from Andersen Consulting Andersen 1998 shows that among European senior executives only 19% regard Electronic Commerce as a serious competitive threat to their business Furthermore only 39% are taking steps today to incorporate Electronic Commerce into their current

operational strategies There is a number of factors contributing to the wait and see attitude taken by executives and consumers as well Executives tend to view the rise of Electronic Commerce as an external business environment issue while consumers are concerned about security issues These are still common views in the US In European countries a cultural problem stemming from a slowly changing and stable business environment adds to that problem Fear of failing by trying a new approach in most cases overshadows the willingness to take new risks Nevertheless the uncertainty about the changes implied by Electronic Commerce are far reaching and can be found in any country With the increasing importance of the Internet the business environment as well as other areas in society is about to fundamentally change Old paradigms are no longer working in the evolving new business world sometimes called digital economy Electronic Commerce is the keyword that tries to capture the new paradigms which are not even clear yet The only thing that is reliable and predictable about Electronic Commerce and the new economy is change Never before was it more important to be flexible and willing to take risks by trying new approaches As businesses like to operate in a predictable environment where planning the future is easy it becomes very difficult to adapt to the pace of change Not only do businesses need new strategies they also need to constantly reinvent themselves Businesses need to realize that it becomes necessary to accept **Amazon Odyssey**

**Underdeveloping the Amazon** Stephen G. Bunker,1985 Underdeveloping the Amazon shows how different extractive economies have periodically enriched various dominant classes but progressively impoverished the entire region by disrupting both the Amazon Basin's ecology and human communities Contending that traditional models of development based almost exclusively on the European and American experience of industrial production cannot apply to a regional economy founded on extraction Stephen G Bunker proposes a new model based on the use and depletion of energy values in natural resources as the key to understanding the disruptive forces at work in the Basin 800 leagues on the Amazon.-pt.

Moundbuilders of the Amazon Anna Curtenius Roosevelt,1991 Moundbuilders of the Amazon shows that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Additionally the comprehensive use of such techniques by all archaeologists doing fieldwork anywhere could revolutionize archaeology allowing archaeologists to look inside sites rather than simply excavate them Using a variety of remote sensing techniques Roosevelt documents the existence of a major moundbuilding culture possessing monumental architecture and a rich artistic tradition on the lowland tropical floodplain of Marajo Island at the mouth of the Amazon River in Brazil from about 400 A D to about 1 300 A D Marajo Island at the mouth of the Amazon River is about the same size as Switzerland or Belgium A well developed civilization existed there from about 400 A D to 1 300 A D comparable in many ways to the Inca civilization to the west or to the Aztec and Maya cultures to the north or in some interesting ways to the Pharonic cultures which developed at the mouth of the Nile Because this civilization had no stone at its disposal it expressed its monumental architecture in packed dirt which washed back into the alluvial floodplain long ago effectively preventing archaeological discovery until the recent development of sophisticated techniques of remote sensing and reconstruction Key Features Reports on the most extensive stratigraphic excavations ever of an ancient Amazonian civilization adapted to a floodplain environment Introduces the first use of geophysics for archaeology in non specialized language Illustrates for the first time the elaborate art of a complex society that was indigenous to the tropical lowlands Describes monumental sites rich polychrome pottery and the first extensive biological remains ever recovered in an Amazonian site Proves that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Shows that the comprehensive use of such methods could revolutionize archaeology by allowing archaeologists to look inside sites rather than simply excavate them Provides examples which prove that the theories about the limitations of the tropical environment for cultural evolution are simply untrue and were based on faulty knowledge of the region and its archaeology
