**The College Textbook Publishing Industry in the U.S. 2000-2022** Albert N. Greco, 2023-05-17 This book explores the college textbook publishing industry from its inception in medieval universities through the late 20th century to the present day which has led to an existential crisis for some publishers. The various sections in this book offer a comprehensive analysis of the substantive developments, problems, and concerns about a myriad of major issues that confronted the higher education textbook sector after 2000. Chapters incorporate highly reliable textbook statistical sources as well as a review of some marketing theories utilized by these publishers e.g. understanding the threat of substitute products, the sale of used and rental texts, the sale of new digital textbooks.

*Health Informatics - E-Book* Lynda R. Hardy, 2022-12-02 American Journal of Nursing AJN Book of the Year Awards 1st Place in Informatics 2023 Selected for Doody's Core Titles 2024 in Informatics. Learn how information technology intersects with today's health care. *Health Informatics: An Interprofessional Approach* 3rd Edition follows the tradition of expert informatics educators Ramona Nelson and Nancy Staggers with new lead author Lynda R. Hardy to prepare you for success in today's technology-filled healthcare practice. Concise coverage includes information systems and applications such as electronic health records, clinical decision support, telehealth, mHealth, ePatients, and social media tools as well as system implementation. New to this edition are topics that include analytical approaches to health informatics, increased information on FHIR and SMART on FHIR, and the use of health informatics in pandemics. Chapters written by experts in the field provide the most current and accurate information on continually evolving subjects like evidence-based practice, EHRs, PHRs, mobile health, disaster recovery, and simulation. Objectives, key terms, and an abstract at the beginning of each chapter provide an overview of what each chapter will cover. Case studies and discussion questions at the end of each chapter encourage higher level thinking that can be applied to real world experiences. Conclusion and Future Directions discussion at the end of each chapter reinforces topics and expands on how the topic will continue to evolve. Open ended discussion questions at the end of each chapter enhance students' understanding of the subject covered. The mHealth chapter discusses all relevant aspects of mobile health, including global growth, new opportunities in underserved areas, governmental regulations on issues such as data leaking and mining, implications of patient generated data, legal aspects of provider monitoring of patient generated data, and increased responsibility by patients. Important content including FDA and state based regulations, project management, big data, and governance models prepares students for one of nursing's key specialty areas. UPDATED Chapters reflect the current and evolving practice of health informatics using real life healthcare examples to show how informatics applies to a wide range of topics and issues. NEW Strategies to promote healthcare equality by freeing algorithms and decision making from implicit and explicit bias are integrated where applicable. NEW The latest AACN domains are incorporated throughout to support BSN, Master's, and DNP programs. NEW Greater emphasis on the digital patient and the partnerships involved including
