International Adaptation gives students the practical knowledge and skills to identify ethical dilemmas, understand ethical behavior in themselves and others, and advocate for ethical behavior within their organization. The course focuses on three ethical questions: the individual, the organization, and the societal perspective. These questions and views explore different areas of business ethics such as the use and abuse of power, challenges to honesty and integrity, and participation in ethical interventions such as reporting, repair, forgiveness, and reconciliation. Most business ethics courses are based on a single point of view. Depending on the viewpoint, this might be based on philosophical theory, organizational behavior, or a legal and regulatory compliance approach. As an author team, we combine and integrate these points of view into a unified whole by incorporating unique content, original videos, and adaptable case studies to assist students in making ethical decisions in their professional and personal lives. This International Adaptation explores different areas of business ethics such as the use and abuse of power, challenges to honesty and integrity, and participation in ethical interventions such as reporting, repair, forgiveness, and reconciliation. Every chapter now includes new questions to help readers test their understanding of the subject. There is also new mini cases that are contemporary and more relevant to the global scenario. *Financial Accounting* Paul D. Kimmel, Jerry J. Weygandt, Jill E.
