The British National Bibliography Arthur James Wells, 2001    **Advanced GNVQ Engineering Mathematics** J. C. Yates, 1995    **A Spreadsheet Approach to Maths for GNVQ Engineering** Rosamund Sutherland, Daniel Howell, Alison Wolf, 1996 This unique text uses tried and tested methods developed by the authors during a recent Nuffield Foundation project set up to investigate maths needs for GNVQ. Most areas of engineering mathematics are well suited to the spreadsheet approach and many students find the techniques easier to handle than more conventional computational methods. This text covers spreadsheet procedures for application of number core skills and about two thirds of the areas of maths needed for the GNVQ Maths for Engineering advanced unit but does not attempt to cover those problems more sensibly tackled by conventional means. By attempting the questions and assignments within the book the student compiles a record of competence suitable for inclusion in the portfolio and assessment. To this end worked examples have solutions but answers to all other exercises are to be found in the lecturers guide available free to teaching staff only.
