**[Triple Crown Leadership: Building Excellent, Ethical, and Enduring Organizations](#)** Bob Vanourek, Gregg Vanourek, 2012-07-10

Provides practical advice and tools for developing better leadership     **[Rules on Digital Trade in the Light of World Trade Organization Agreements](#)**

Asif Khan, 2023-12-14 Doctoral Thesis Dissertation from the year 2023 in the subject Business economics Trade and Distribution language English abstract This doctoral dissertation deals with rules on digital trade in the light of WTO agreements. Digital trade has brought about profound changes in the international trade framework. Traditional trade which primarily involved the exchange of physical goods has now expanded to encompass a wide range of digitally delivered services, online transactions and data flows. This transformation has been driven by advancements in technology and the increasing interconnectedness of the global economy. The digital economy encompasses various digital technologies and platforms and has become a significant driver of economic growth and innovation. It allows businesses to reach international markets more quickly and efficiently, transcending geographical barriers. The internet, mobile devices, cloud computing and artificial intelligence have facilitated this digital transformation. These technologies enable seamless communication, data storage and processing, automation and personalised services, revolutionising how businesses operate and engage in international trade. Digital trade has created new opportunities for businesses of all sizes. Small and medium sized enterprises have benefited from the ability to access global markets through digital platforms and e-commerce. These platforms provide a means for small and medium sized enterprises to connect with potential customers worldwide, establishing

their presence and market their products and services without needing a physical presence in foreign markets. This has lowered entry barriers and empowered small and medium-sized enterprises to participate in global value chains, expanding their reach and contributing to economic growth. One of the notable developments in the digital trade era is the rise of platform-based businesses. These platforms, such as e-commerce marketplaces, ride-sharing services, and online payment systems, act as intermediaries connecting buyers and sellers across borders. They facilitate transactions, provide infrastructure and services, and enable businesses to expand their customer base globally. Platforms have become influential players in international trade, shaping market dynamics and redefining traditional trading systems.

**Big or Smart Data? Recent trends in Data Science for sales and marketing** Julia Ertel, 2022-05-09. Bachelor Thesis from the year 2021 in the subject Business economics. Miscellaneous grade 1.0. Pforzheim University language English abstract: Big data is getting larger, the pressure in the market to use the existing data is getting stronger, and therefore also the number of companies that address the topic of data science increases. This dissertation focuses on identifying big or smart data science trends in marketing and sales within the consumer packaged goods industry. The objective of this research is to address actual opportunities around data science for the selected focus area. The following

research project analyzes those opportunities and identifies nine data science trends. Via in depth interviews the expert's experiences and difficulties with data science are questioned. Emotions that arise through the interaction with this science are recognized and potentials for improvements are discussed. Subsequently central meaningful quotations are analyzed with Mayring's qualitative content analysis reformulated into condensed codes and summarized through eighteen overarching categories. The general findings of this analysis include the necessity of smart data insights within this low margin industry, the dependence on consultancy support due to knowledge gaps, expandable engagement in the B2B environment, the promotion of data thinking and acting, the merge of sales and marketing for data science knowledge generations, and the extension of data science knowledge to maintain competitive advantage within the market for the long run. The improvement proposals consist mainly of automated data cleaning, intelligent algorithms, data handling, knowledge development, data democracy, and knowledge combinations in form of project dependent focus teams to broaden data science applications within the industry.
