*Business Challenges and Opportunities in the Era of Industry 5.0* Simon Grima, Salih Serkan Kaleli, Mehmet Baygin, Engin Boztepe, 2025-02-14

Industry 5.0, also known as the fifth industrial revolution, is characterised by advanced technologies such as artificial intelligence, the Internet of Things (IoT), and robotics in manufacturing and other industries. The use of innovative technologies in Industry 5.0 can bring several benefits to companies and the industrial sector, including increased efficiency and productivity, improved product quality, and the ability to create new products and services. In addition, these technologies help businesses to reduce their environmental impact and operate more sustainably.

*Business Challenges and Opportunities in the Era of Industry 5.0* discusses the development and current technologies within Industry 5.0 and how these apply to various disciplines and sectors such as education, health, finance, production, automotive, and construction. This book delves into various Industry 5.0 technologies and how these can improve production and give businesses a competitive edge to remain relevant in a rapidly changing business landscape.

The ESFIRM series collects quantitative and qualitative studies in areas relating to finance, insurance, and risk management. Subjects of interest may include banking, accounting, auditing, compliance, sustainability, behaviour management, and business economics. In the disruption of political upheaval, new technologies, climate change, and new regulations, it is more important than ever to understand risk in the financial industry. Providing high quality academic research, this book series provides a platform for authors to explore, analyse, and discuss current and new financial models and theories, and engage with innovative research on an international scale.

*The Intelligence Explosion* James Barrat, 2025-09-02

With the rapid rise of generative artificial intelligence, both existential fears and uncritical enthusiasm for AI systems have surged. In this era of unprecedented technological growth, understanding the profound impacts of AI, both positive and negative, is more crucial than ever. In *The Intelligence Explosion*, James Barrat, a leading technology expert, equips readers with the tools to navigate the complex and often chaotic landscape of modern AI. This compelling book dives deep into the challenges posed by

generative AI exposing how tech companies have built systems that are both error prone and impossible to fully interpret Through insightful interviews with AI pioneers Barrat highlights the unstable trajectory of AI development showcasing its potential for modest benefits and catastrophic consequences Bold eye opening and essential The Intelligence Explosion is a must read for anyone grappling with the realities of the technological revolution

**Research With OpenAI Models** Demir, Şirvan Şen, Demir, Mahmut, 2024-06-05 As classrooms move from chalkboards to digital platforms there s a critical juncture where the potential of AI intersects with the future of academia The problem is multifaceted it involves the nature of pedagogy the demand for personalized learning experiences and the ethical considerations inherent in deploying AI technologies Educators researchers and administrators face the challenge of navigating this transformation while ensuring inclusivity fairness and ethical practice Integrating AI in higher education risks becoming a chaotic endeavor without a comprehensive understanding of the opportunities challenges and ethical dimensions The lack of a strategic approach could lead to biases privacy concerns and a digital divide exacerbating educational inequalities Enhancing Higher Education and Research With OpenAI Models explores the intersection of artificial intelligence and higher education focusing on the social sciences A collaborative team of academics and AI experts analyses aims to illuminate the transformative potential of integrating AI technologies into traditional educational settings The book unravels the rich tapestry of the history of higher education in the social sciences tracing the evolution from conventional blackboards to the modern digital landscape It meticulously examines the increasing integration of technology in classrooms It sets the stage for the impact of AI driven tools and data analytics on pedagogy personalized learning experiences and broader access to education

### **Empire of AI** Karen Hao, 2025-05-20 A New York Times Notable Book Finalist for the

National Book Critics Circle Award An Instant New York Times Bestseller Named a Best Book of the Year by Smithsonian and Scientific American A bestselling page turner that has made waves not just in Silicon Valley but around the world With Empire of AI Hao is fundamentally shaping many people s perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture From a brilliant longtime AI insider with intimate access to the world of Sam Altman s OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost

unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era
