The greatest challenge in pricing is the human factor. To price effectively customer psychology usually trumps rational microeconomic thinking. The book introduces the latest thinking about Psychological Pricing the science of designing effective pricing strategies using behavioral economics principles. You will learn how customers search for evaluate share and use prices in their buying decisions how they participate in setting prices and what managers can do to understand and influence these processes. Psychological pricing actions are levered. Many of them require relatively small investments and produce disproportionately large returns to the business
