Sparzo,1985 This booklet is about changing human behavior in everyday settings in the school and home The approach to human behavior outlined is called behavior analysis which is based on that approach to psychology called the experimental analysis of behavior The ABC model of behavior is explained In this model the A refers to the antecedent that occasions or cues the behavior B refers to the behavior itself and C refers to a consequent event that increases the likelihood of the behavior occurring again An outline is presented of a general plan for changing behavior Illustrating how the plan works in practice behavior analysis principles are applied to three cases a child who acts aggressively a behavioral excess a student said to be unmotivated a behavioral deficit and an unruly class a group management problem JD     *Creating the Big Game* Wiley L. Umphlett,1992-10-26 John W Heisman 1869 1936 was a man of many faces whose public image has suffered from a diffused enigmatic and mostly misunderstood private personality Since his death the popular reception of the memorial trophy named in his honor has also obscured his identity In singling out his many innovative contributions to the development of intercollegiate football this book attempts to present a true picture of Heisman as both man and coach Because he coached at schools throughout the country during some of the most eventful years in our history Heisman s life relates to significant political economic and social developments that impacted on American society as well as sports However this book is much more than the story of John Heisman s 36 year coaching career It is also the story of how an indigenous American public ritual the Big Game came about and how college football evolved into the complex problematic and highly structured big business that it is today     *Bulletin* Ore Pacific university, Forest Grove,Pacific University,1963
