*Advanced Methods for Modeling Markets* Peter S. H. Leeflang, Jaap E. Wieringa, Tammo H.A. Bijmolt, Koen H. Pauwels, 2017-08-29 This volume presents advanced techniques to modeling markets with a wide spectrum of topics including advanced individual demand models time series analysis state space models spatial models structural models mediation models that specify competition and diffusion models. It is intended as a follow on and companion to *Modeling Markets* 2015 in which the authors presented the basics of modeling markets along the classical steps of the model building process specification data collection estimation validation and implementation. This volume builds on the concepts presented in *Modeling Markets* with an emphasis on advanced methods that are used to specify estimate and validate marketing models including structural equation models partial least squares mixture models and hidden Markov models as well as generalized methods of moments Bayesian analysis non semi parametric estimation and endogeneity issues. Specific attention is given to big data. The market environment is changing rapidly and constantly. Models that provide information about the sensitivity of market behavior to marketing activities such as advertising pricing promotions and distribution are now routinely used by managers for the identification of changes in marketing programs that can improve brand performance. In today's environment of information overload the challenge is to make sense of the data that is being provided globally in real time from thousands of sources. Although marketing models are now widely accepted the quality of the marketing decisions is critically dependent upon the quality of the models on which those decisions are based. This volume provides an authoritative and comprehensive review with each chapter including an introduction to the method methodology a numerical example application in marketing references to other marketing applications suggestions about software. Featuring contributions from top authors in the field this volume will explore current and future aspects of modeling markets providing relevant and timely research and techniques to scientists researchers students academics and practitioners in marketing management and economics.

Too Much is Not Enough! Beth R. Bernhardt, Leah H. Hinds, Katina P. Strauch, 2014 Almost one hundred presentations from the thirty third annual Charleston Library Conference held November 6-9 2013 are included in this annual proceedings volume. Major themes of the meeting included open access publishing demand driven acquisition the future of university presses and data driven decision making. While the Charleston meeting remains a core one for acquisitions librarians in dialog with publishers and vendors the breadth of coverage of this volume reflects the fact that this conference is now one of the major venues for leaders in the publishing and library communities to shape strategy and prepare for the future. At least 1 500 delegates attended the 2013 meeting ranging from the staff of small public library systems to the CEOs of major corporations. This fully indexed copyedited volume provides a rich source for the latest evidence based research and lessons from practice in a range of information science fields. The contributors are leaders in the library publishing and vendor communities.
