Theories, Models, and Practices of Literacy Misty Sailors, Idalia Nuñez, Vaughn W. M. Watson, James V. Hoffman, Donna E. Alvermann, 2025-11-11 This eighth edition of Theoretical Models and Processes of Literacy a foundational text in literacy research is updated to represent a new era in contemporary and critical scholarship. With a revised name the intentional inclusion of diverse perspectives and new organizational structure *Theories Models and Practices of Literacy* thoroughly represents the theories that drive literacy and the scholars who write about and within the field. While still representing the most comprehensive source for connecting theories to literacy research and practice this eighth edition builds on preceding editions contextualizing its historical roots promoting and highlighting contemporary and critical theories and envisioning future directions in literacy. This volume addresses theories across ten sections including early youth and community literacies teaching literacy and literacy teacher education dis abilities and disciplinary literacy theories digital and multimodal literacies and the disruption of colonial boundaries in language and global literacies. The chapters in this volume are curated to inspire the interrogation of literacy theory and foster its evolution. Additional archival essays from previous editions will remain available as Support Material on the book's webpage. New to the eighth edition 80% new material and significantly revised previous materials to reflect emerging and contemporary theories and scholarship. A more globalized approach to theorizing literacy practices including those with onto epistemological perspectives rooted in people's lived experiences literacies and languages to engage scholars and audiences who may be new users of the text. New avenues for readers to explore how theory informs practice practice informs theory and how both are taken up in various contexts e.g. classrooms schools communities and societies.

Reading Randomised Controlled Trials Robert Savage, Amy Fox, Anneka Dawson, Helen Gray, Clare Huxley, 2025-03-03 In early 2021 22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children. This study aimed to provide valuable insights into the success of largely school based education trials. The Flexible Phonics trial proved to be not only an important experiment in improving children's literacy but a case study in which the methodology of single randomised controlled trials in education can be considered. *Reading Randomised Controlled Trials* investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity. The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports. Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials. The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021.

during the Covid 19 pandemic Reading Randomised Controlled Trials is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education
